Fruitland Nurseries
Augusta, Georgia.
Season of 1936-1937.
WHERE NATURE SMILES
THIS IS YOUR NURSERY GUIDE

Your patronage, criticism and interest, as well as that of your grandparents, have made possible our eighty years of service in furnishing quality nursery stock.

- **FRUITLAND’S LANDSCAPE DIVISION.** Our Landscape Planning and Planting Service is in charge of experienced men. This most complete service is yours also.

- **PLANNING.** We are prepared to design the area which you wish to develop, regardless of the size, whether the home lot, church, school, estate or park.

- **PLANTING.** Our charges for this phase is most reasonable, as only trained men are used who execute expeditiously all planting.

- **MAINTENANCE.** Relieve yourself of the responsibility of caring for your grounds. FRUITLAND will care for your grounds full time, or while you are away through the summer. Perhaps you have a gardener whom you would like advised regarding spraying, etc. We have been very successful in pleasing our clients with this much-needed service. We should be glad to give you further information relative to this.

- **TREE SURGERY.** Trees are one of your most beautiful and valuable assets to the home grounds, and should be given every attention. FRUITLAND’S tree surgeons are expert in their line and have had wide experience.

- **PRUNING, SPRAYING AND LAWN PLANTING.** These necessary aids to the beauty of your grounds are attended to economically by us. Fashions change—even in landscape design. We strive for new ideals in beauty. New plants are introduced. Be modern—have FRUITLAND increase your property values by making your grounds more attractive. Our charges are really most reasonable, considering our service.

- **FRUITLAND’S 250-ACRE NURSERIES** are situated where there is a diversity of soils, making it possible for us to grow such a varied collection of beautiful plants and trees. From the propagating department, where hundreds of thousands of plants are started, to the final transplanting field, all plants are given every attention to help make them healthier and more beautiful, for these are your plants and we know that you do not want us to spare any expense to make them the pride of your grounds.

- **WHEN ORDERING,** use names as given in catalog, using the convenient order blank in this catalog. Do not forget to fill in your name and address with shipping instructions. We are most careful in filling your orders, but you know to err is human, and when we make a mistake let us know at once and we shall make adjustments satisfactory to you. We, of course, cannot be responsible for loss of plants from sources beyond our control, such as lack of attention on buyer’s part during spells of unfavorable weather. **REPORT OF LOSS OF PLANTS MUST BE MADE WITHIN TWO WEEKS OF RECEIPT OF SHIPMENT.**

- **TERMS.** Our terms are cash, unless otherwise arranged in advance. On all C. O. D. orders we require a 25 per cent deposit in advance.

- **WE HAVE NO AGENTS.**
Spring and Summer Blooming Bulbs

GLADIOLUS
The Most Satisfactory Cut Flowers

Fruitland Mixtures of Large-flowering Gladiolus
A splendid mixture of fine varieties. In it you will find a rich combination of bright-colored flowers.

Delivery in January. 40c doz.; $2.50 per 100.

DAFFODILS
$1.00 per doz.; $6.50 per 100.
Emperor. Large yellow blooms.
Empress. Trumpet yellow; perianth white.

HYACINTHS
$1.50 per doz. $10.00 per 100.
Gertrude. Brilliant pink.
Grand Maitre. Bright porcelain-blue.
L’Innocence. Pure white.

JONQUILS
Campernelle rugosa. Single; yellow; very fragrant. Larger than the plain Campernelle. $1 per doz.; $7.50 per 100.

NERINE SARINENSE
Guernsey Lily. $1.00 per dozen; $7.50 per 100.

SNOWDROPS
Too well known to need description. 75c per dozen. $5.00 per 100.

DARWIN TULIPS
60c per doz.; $4.50 per 100. (named varieties).
Bartig. Pliery red.
Clara Butt. Salmon-pink.
Farncombe Sanders. Bright scarlet.
Inglecombe Yellow. Yellow.
Pride of Haarlem. Rosy carmine.
Princess Elizabeth. Deep rose-pink.
William Copeland. Delicate lavender.
Mixed. 50c per doz.; $3.75 per 100.

ZEPHYRANTHES
ATAMASCO
Zephyr or Fairy Lily. 35c per doz.; $2.50 per 100.

Fruitland's Reliable Flower Seeds

AGERATUM. Floss Flower
Blue Ball. Compact round plants, 6 to 8 in. tall. Pure blue flowers. Pkt., 15c; ½ oz. 30c.

ANTIRRHINUM MAXIMUM
Giant Snapdragons
Canary Bird. Gigantic; canary yellow.
Fordhook Rose. Blending shades of rose-pink and yellow.
Orchid. Bright mauve-pink with deeper colored tube.
Sunnybrook. Combines rich shades of deep golden-yellow, salmon and orange.

PRICES of above: Pkt., 15c. 1/16 oz., 40c.
Tall Giant-Flowered Mixed. A splendid mixture of all tall-growing giant varieties. Pkt., 15c. 1/16 oz., 35c.

AQUILEGIA. Columbine
Long-spurred, Blue Shades.
Long-spurred, Pink Shades.
Long-spurred, Lemon Queen.

PRICES of above: Pkt., 25c. 1/16 oz., 60c.
Long-spurred Hybrids: Pkt., 15c. ⅛ oz., 50c.

ASTERS

CARNATION. Chabaud’s Giant Improved
Mixed. Pkt., 15c. ⅛ oz., 50c.

CALENDULA. Scotch Marigold
Golden Ball (Ball's Gold). Deep yellow. Pkt., 20c. ⅛ oz., 60c.
Orange Ball (Ball's Orange). Orange blooms of great size. Free flowering. Pkt., 20c. ⅛ oz., 60c.

COSMOS
Klondike. Single orange colored flowers; tall; fall blooming. Pkt., 10c. ⅛ oz., 20c.
Orange Flare. A.A.S. Gold Medal. Grand Champion. Southern origination; early flowering annual, blooming in only 2½ months from seed. 2 to 3 ft. tall, bushy plants with marigold-like foliage. Best new flower in decade. Pkt., 15c.
Sensation. A.A.S. Award of Merit. Huge pink and white flowers 4-6 in. across. Early blooming. Height, 4-6 ft. Pkt., 25c.

DAHLIA
Belladonna Seedlings. Large, single flowers, varying through all shades of blue, on 3-foot spikes. Pkt., 20c. 1/16 oz., 40c.

DELPHINIUM. Hardy Larkspur
Belladonna Seedlings. Large, single flowers, varying through all shades of blue, on 3-foot spikes. Pkt., 20c. 1/16 oz., 40c.
DIANTHUS . Hardy Garden Pinks
Dianthus Winteri. Large, single, fragrant flowers; mixed colors. If seed are sown early, blooms can be obtained the first year. Pkt., 35c. 1/16 oz., 60c.

ESCHSCHOLTZIA . California Poppy

GAILLARDIA . Blanket Flower

GOURDS

HELIOTROPE
Giant Hybrids, Mixed. Fragrant flowers ranging in colors from pure white to violet-blue. Pkt., 15c. 1/6 oz., 50c.

HOLLYHOCKS

IBERIS
Annual Candytuft

IMPATIENS . Sultan’s Balsam
Holstii Hybrids. Includes white, flesh-pink, pink, rose, salmon, orange, carmine, crimson, and violet shades. Give sunny or semi-shaded situation. Plants grow 1 to 2 feet tall. Pkt., 20c. 1/22 oz., 50c.

ANNUAL LARKSPUR

MARIGOLD . Dwarf French Double

NASTURTIUMS

PETUNIAS

BEDDING

BALCONY

GIAN'T-FLOWERED

PHLOX DRUMMONDI

PHLOX GRANDIFLORA

ANNUAL PHLOX

Poppies, Annual

PORTULACA . Sunplant
Portulaca. Rose Moss—Sun Plant. Compact, spreading plant. 8 in. tall. This mixture contains many bright colors. Single. Pkt., 10c. 1/2 oz., 50c.

Salvia . Scarlet Sage

STOCKS
Pkt., 10c. 1/4 oz., 55c. Dwarf Large-flowering.

SWEET PEAES

SWEET WILLIAM . Dianthus
TITHONIA . Mexican Sunflower
Speciosa. Stately plants growing about 10 ft. tall, carrying a great quantity of brilliant orange-scarlet blooms, 3 to 4 in. in diameter. Good for background and for cutting. Blooms profusely in late summer and fall.
Fkt., 25c. ½ oz., 45c.

VINCA . Periwinkle (Annual)
Vinca. Periwinkle. Dark, glossy, green leaves; 12-18 in. tall, for beds or borders. Colors, pink and white mixed.
Fkt., 10c. ¼ oz., 35c.

ZINNIA

DOUBLE LILLIPUT (Dwarf—1 ft). Pkt., 10c. ¼ oz., 35c.
Canary-Yellow.
Crimson Gem.
Salmon-Rose.
Mixed. Pkt., 10c. ¼ oz., 30c.
GIANT DOUBLE DAHLIA-FLOWERED.
Buttercup. Large yellow flowers.
Old-Rose. Good shade of warm, old-rose. Pkt., 15c. ½ oz., 40c.
Fantasy Mixture. A.A.S. Award of Merit, 1935. Has round flowers, composed of a mass of shaggy, ray-like petals, which give a delicate and refined appearance to the medium-sized double flowers. Wide color range; very graceful; superior to Quilled type. Pkt., 25c. ½ oz., 50c.

GIANT CACTUS—Flowered. Mixed colors. Large, attractive flowers, 3 to 4 in. across, with petals partially quilled, giving the flower somewhat the appearance of a Cactus Dahlia. Plants grow 3 ft. tall. Pkt., 15c. ½ oz., 35c.

GIANT Dahlia-flowered Mixed. Pkt., 15c. ½ oz., 30c.

FRUITLAND LAWN SEED

In the South the best period for lawn-making is from September to December—the earlier the better. Do not attempt to make a lawn during very dry or extremely windy weather. In preparing the soil it should be plowed as deeply as possible and then subsoiled, harrowed, and all stones removed. If plowing is not practical, have the ground spaded carefully and thoroughly. To feed the grass, use sheep-manure at the rate of 1,000 pounds to the acre, or bonemeal at the rate of 800 pounds to the acre. Work this food well into the soil, level the ground, and rake perfectly smooth. Broadcast the seed at the rate of 75 to 100 pounds to the acre (210 by 210 feet), rake lightly, cover the seed, and then roll. If you cannot get a roller, firm the soil with a plank or flat tamper. During hot, dry weather use a lawn-sprinkler or spray-nozzle after sunset—do not spray when the sun is shining, nor apply the water with great force. During prolonged dry spells, water each evening. Established lawns may be lightly reseeded each autumn, covering the bare spots and insuring a substantial turf.

FRUITLAND Mixture of Special Grasses for Southern Landscapes
After years of testing we have decided that the Fruitland Grass Mixture will give most satisfactory results for Southern lawns. It is composed of grasses that have the greatest heat- and drought-resisting qualities. The varieties are carefully blended to give a mixture that will withstand hot weather better than any evergreen lawn grass that we have been able to obtain. Of course, during periods of intense heat and drought, all evergreen lawn grass will burn more or less. All of the seed used in Fruitland Mixture has been resealed, is strictly free from weeds, and is of high germination.

Bushel Centipede Grass Cuttings $2.50

Becoming popular in this section. The blade of this grass is not as wide as the Charleston Grass.

Charleston or St. Augustine Grass Cuttings 2.50

Wide-blade grass, suitable for summer lawns.

• The Sand Hills Garden Club, of Augusta, sponsors a mid-winter Camellia japonica flower exhibition in their historic club house, where thousands of exquisite Camellia flowers from all over the country are on display. The date is fixed by weather conditions, though usually in February.

• Quitman, Ga.; Columbus, Ga.; Macon, Ga.; Norfolk, Va., besides other Southern cities, have exhibitions devoted to these magnificent flowers. Further information regarding these exhibitions will be gladly furnished by FRUITLAND.
# FLOWERING SHRUBS

## from Fruitland Nurseries

We Guarantee Live, Healthy Quality

**Stock at LOWEST PRICES**

- **FLOWERING SHRUBS** give the finishing touch so much required by small and large homes and grounds. When properly arranged, shrubs will soften the lines of the foundation, will provide an effective border or screen, will cover the edges of walls and screen objectionable views. Shrubs may also be used for covering slopes and for dividing the landscape into small sections, and for bordering the outdoor living-room of small homes. A selection of varieties will give a succession of flowers from spring until late autumn and after the foliage has fallen the brilliant berries and branches add color and cheer to the winter landscape.

All of these advantages and many more will come from a proper selection of Flowering Shrubs, and a small investment will pay for itself many times over by increasing the value of your property and your satisfaction in ownership.

The figure after each variety denotes ultimate height of plant.

**ALTHAEA frutex.** See Hibiscus syriacus.

---

### BUDDLEIA . Butterfly Bush

*Buddleia** davidii magnum (Oxeye Butterfly Bush). 8 ft. Flowers a deep shade of violet. Plant is a tall grower, and blooms from June until frost. Very ornamental. Should be cut to within 12 inches of ground in late winter, thus giving more blossoms and making a more shapely plant. The blossoms are on the current year's growth. A Chinese shrub.

## Glossary

**AZALEA**
When planting Azaleas, soil from the woods should be used and plants mulched with half-rotted leaves, thus reproducing, as nearly as possible, their native environment.

*Azalea calandulacea* (Great Flame Azalea). 6 to 10 ft. One of the many beautiful native flowering plants which grow throughout the eastern states. The blossoms appear in April, in clusters, and are of various colors—yellow, orange, buff and various shades of red. We offer a variety of colors, but plants are not separated as to color.

*Azalea nudiflora* (Pinxterbloom: Wood honeysuckle). 6 to 10 ft. The well-known native variety which produces fragrant, pinkish white blossoms in April before the leaves appear.

All Azaleas:

Landscape architects will find at FRUITLAND NURSERIES a collection of large size plants for immediate effect.

Satisfied Customers is Our Goal.
CHILOPSIS
Desertwillow
Chiophysis linearis. 20 ft. A large shrub native to Texas and Mexico. Narrow willow-like foliage; handsome f r u m p t e d l i a c and yellow flowers produced from July until frost. Each
2 to 3 ft. $ .50
18-24 in. $ 1.00 $ 6.50

CHIONANTHUS
Fringetree
Chionanthus virginica (White Fringetree). 10 ft. A native, white flowering shrub, known locally as Grandaddy's Gray Beard. Flowers in May. Each
2-3 ft. $1.00 8.50
18-24 in. $ .75 6.50

CUDRANIA . Silkworm Tree
Cudrania tricuspidata (Vanieria). Chinese Silkworm Tree. 20 ft. A thorny shrub, or small tree, producing edible red fruits. Each
3 to 4 ft. $ .50 4.00

CYDONIA . Japan Quince
Cydonia japonica (Flowering Quince). 6 ft. One of the most showy early-flowering shrubs, commencing to bloom in late winter, followed by quince-like fruits in August, which may be made into preserves and jellies. We offer mixed colors only. Each
3 to 4 ft. $ .75 6.50
2 to 3 ft. $ .50 4.50
18 to 24 in. $ .35 3.00

CYTISUS . Scotch Broom
Cytisus scoparius. 10 ft. A native of Europe. In April this plant is a mass of golden yellow, pea-shaped flowers. Stems, being green, give this the appearance of an evergreen shrub. Each
12 to 18 in. $ .35 2.50

DAUBENTONIA
Daubentonia punicea. 10 ft. This South American legume is perfectly hardy here. Handsome racemes of red flowers freely produced in May and June, followed by curious angled seed pods. Each
Strong plants, 2 to 3 ft. $ .50 4.50

EXOCHORDA . Pearl Bush
Exochorda grandiflora. 10 ft. A desirable, large shrub, from China, with pure white flowers produced in great profusion about the middle of March. When in full bloom the plant has the appearance of a snowbank, and when planted in a mass is most conspicuous. Does not require much pruning. Each
4 to 5 ft., well branched $ .75 6.00
3 to 4 ft., well branched $ .60 5.00
2 to 3 ft., well branched $ .50 4.50
18 to 24 in., well branched $ .35 3.00

F. Intermedia spectabilis. 6 to 8 ft. The most beautiful of the Golden Bells. Profusion of large bright yellow flowers in March. Each
2 to 3 ft. $ .50 4.50
3 to 4 ft., well branched $ .50 4.00
2 to 3 ft., well branched $ .35 3.00

F. suspensa (Weeping Forsythia). 6 to 8 ft. A graceful variety with long, slender drooping branches. Leaves dark, shining green. Flowers yellow, produced in great profusion in March. 2 to 3 ft. only.
F. suspensa fortunei (Fortune Forsythia). 6 to 8 ft. Similar to F. suspensa, but habit is more upright and vigorous. Flowers golden yellow, frequently with twisted petals. A desirable variety. Blooms in March.
F. viridissima (Greenstem Forsythia). 6 to 8 ft. Flowers golden yellow, produced in great profusion last of February or early in March. Most effective when planted in large groups. 2 to 3 ft. only. All Forsythias: Each 10
4 to 5 ft., well branched $ .65 5.50
3 to 4 ft., well branched $ .50 4.00
2 to 3 ft., well branched $ .35 3.00

FOTHERGILLA
Fothergilla gardeni. Dwarf Fothergilla. 3 ft. A native small shrub, having in April numerous spikes of slightly fragrant white flowers. Each
15 to 18 in. $ .75

GORDONIA
Gordonia alatamaha (Franklinia alatamaha) 15 to 20 ft. Very rare. Blooms from early August until frost. Blossoms very large; snow-white with golden yellow stamens; breathes forth a delicate, balmy fragrance. Very desirable. Each
4 to 5 ft. $ 5.00
2 to 3 ft. $ 2.50

WE FUMIGATE OUR STOCK AS REQUIRED BY STATE LAW
HIBISCUS . Althea
Hibiscus syriacus (Althea frutex; Shrub Althea). 10 ft. The single, semi-double, and double flowers are produced from May until September. When planted in masses of contrasting colors, the effect is most pleasing. Hydrangea varieties are also
Honeysuckle. See Lonicera.

HYDRANGEA
Hydrangea macrophylla. 12 ft. When given a rich, moist soil, protected from after-

JASMINUM . Jasmine
Jasminum floridum (Flow-
ery Jasmine). 3 ft. From
China. Golden yellow
flowers, half an inch in
diameter, produced during
summer. Hardy as far
north as Washington.

A NEW HARDY PINK JASMINE
Fragrant, pale pink flowers, produced in clusters in late
April.

KERRIA . Globe Flower
Kerria japonica flore-plena (Corchorus japonicus). 6 ft. An old favorite.
It is of spreading habit, with double yellow blooms about an inch in diam-
eter, which appear early in April. Effective for massing.

KOLKWITZIA
Beauty Bush
Kolkwitzia amabilis. 6 ft. A
charming new shrub from
China. It is hardy in the New
England States. Has general
resemblance to weigela and
hoseynsuckie, the beautiful
turpent-shaped flowers appear-
ing in abundance in April.

LAGERSTROEMIA
Crape Myrtle
Crape Myrtles will sometimes
remain dormant, not putting out
leaves for a year. They should be
kept pruned and well fertilized in
February, the blossoms during that
season will be much more beau-
tiful. During wet seasons these

WE GUARANTEE SATISFACTION IN EVERY TRANSACTION
LAGERSTROEMIA—Continued

plants are attacked by a disease which turns the foliage black. Two sprays will usually control this, one as soon as it is noticed on plants; another two weeks later. Use one-half pound Fungi-Bordo and 6 teaspoonsful Buck-Leaf 40 to each 3 gallons of water.

Lagerstroemia indica (Crape Myrtle). 20 ft. A popular and free flowering shrub, or small tree, which produces blooms in great abundance throughout the summer. The flowers are beautifully fringed and are borne in large clumps. A massing of these, or a single specimen, makes a most striking effect. Commences to bloom in June. All plants will be pruned before shipping. First year blooms not always true. Write for prices in larger quantities.

Specimens in crimson and pink only, $2.00 to $3.50 each.

Each
5 to 7 ft., well branched $1.50 $2.50
4 to 5 ft., well branched 1.00 .90
3 to 4 ft., well branched .75 .65
2 to 3 ft. .60 .50
18 to 24 in. .50 .45

LONICERA . Honeysuckle

Lonicera fragrantissima (Winter Honeysuckle), 8 ft. A Chinese shrub. Highly esteemed for its exceedingly sweet-scented pinkish white flowers, which appear in January. The plant continues to bloom for a long time. To keep shapely plants which will give a maximum of bloom, they should be pruned severely and old wood removed directly after flowering every year.

Each
3 to 4 ft. $ .65 $ .50
2 to 3 ft. .50 .45
18 to 24 in. .35 .30

MERATIA . Calycanthus

Meratia praecox (Wintersweet), 10 ft. A Chinese shrub producing exquisitely fragrant yellow flowers, usually about January 1, and lasting for about four weeks. The flowers appear before the leaves. and when in full bloom it is a most pleasing plant. It blooms at a period when our gardens are destitute of flowers.

Each
5 to 6 ft. $2.00
4 to 5 ft. $1.50 $1.25
3 to 4 ft. 1.00 .80
2 to 3 ft. .65 .60
18 to 24 in. .50 .45

PHILADELPHUS . Mock Orange

Philadelphus virginalis. 4 to 6 ft. A handsome, new, vigorous-growing shrub with large, semi-double, fragrant flowers, sometimes 2½ inches across, which are produced in great profusion the latter part of April and early May. Also blooms during the summer.

Each
2 to 3 ft. $1.50 $1.00
18 to 24 in. .35 .30

PRUNUS . Pomegranate

PRUNUS MUME
(Japanese Apricot)

A very early blooming variety. In January the tree is literally covered with a mass of double pink blossoms, making a most conspicuous tree for a lawn. Very scarce.

Each
5 to 6 ft. $1.50
4 to 5 ft. $1.25
3 to 4 ft. $1.00

PUNICA . Pomegranate

Valuable summer-flowering, tall-growing shrubs, perfectly hardy in the South. Flowers are produced in great profusion early in May and last almost during the entire summer. Foliage bright, lustrous green. Very conspicuous and desirable. Prune in late winter, as blossoms are made on current year’s growth.

Punica granatum alba. 20 ft. Double; white.
P. granatum rubra. 20 ft. Beautiful, double, red flowers.
P. granatum variegata. 20 ft. Sometimes red and variegated double blooms will appear on the same plant.

All Punicas:
Each
4 to 5 ft., well branched .60 $5.00
3 to 4 ft. .50 4.00
2 to 3 ft., branched .35 2.50

SALIX . Pussy Willow

Salix discolor. 8 ft. The well-known Pussy Willow, with silky catkins which precede the leaves in early spring. 2 to 3 ft., 50c each; $3.00 for 10.

SAVIA . Autumn Sage

Salvia greggi (Autumn Sage), 4 ft. A native of western Texas, and is, therefore, extremely hardy. It can stand zero weather and resists drought. Carmine flowers come in early spring and continue until frost. Effective for massing.

Each
18 to 24 in., heavy .50 $4.50
12 to 18 in. .35 3.00

Your home landscape is a permanent fixture like your house and lot. It is important to do the initial planting right—and it is where we can help if you consult us.
SPRING-BLOOMING SPIREAS

To keep shapely plants which will give a maximum of blooms, they should be pruned severely, and old wood removed directly after flowering every year.

Spiraea prunifolia plena (Double Bridal Wreath). 4 to 8 ft. From Korea. A beautiful early-blooming variety, with small, double white flowers. Commences to bloom in early March.

S. reevesiana (Reeves Single). 4 to 8 ft. From China. Produces large clusters of single white flowers, covering the entire bush.

S. reevesiana lanceata (Reeves Double). 4 to 8 ft. Large, round clusters of double white flowers cover the entire plant. Blooms latter part of March and continues for several weeks.

S. vanhouttei (Vanhoutte Spirea). A graceful shrub growing 6 to 8 ft. in height. Produces a profusion of single white flowers during the latter part of March. One of the most popular Spireas.

Above four Spireas: Each 10
4 to 5 ft., well branched .................................. $ .50 $ .50
3 to 4 ft., well branched .................................. .40 3.50
2 to 3 ft. ...................................................... .25 2.00

S. thunbergi (Thunberg Spirea). 4 to 6 ft. A beautiful dwarf variety with many slender branches forming a dense bush. In autumn the leaves assume brilliant shades of orange and scarlet. Commences to bloom first of March and lasts for some time. Most desirable for a low hedge and for massing. Native to China and Japan. For hedge grade plants, see page 26.

Each 10
30 to 36 in. ...................................................... $ .60 $ .00
24 to 30 in. ...................................................... .45 4.00
18 to 24 in. ...................................................... .35 3.00
12 to 18 in. ...................................................... .25 2.00

PERPETUAL-BLOOMING SPIREAS

Spiraea, Anthony Waterer. 3 to 5 ft. A remarkably free-blooming shrub with upright branches. Leaves bright green, with frequent variegations of yellow. Flowers rose colored. If blooms are cut off as soon as they begin to fade, the plant will bloom the entire season. Makes a low-growing hedge.

S. billardi (Billiard Spirea). 4 to 6 ft. A tall-growing variety. Flowers bright pink, produced in long, dense panicles. Commences to bloom in May and lasts throughout the summer. Very showy.

S. froebeli (Froebel Spirea). 3 to 5 ft. Fine, free-growing sort. Rosy colored flowers, produced last of April in large, flat heads. The young foliage is tinted dark red.

Above four Spireas: Each 10
24 to 30 in. ...................................................... $ .50 $ .00
18 to 24 in. ...................................................... .35 3.00
12 to 18 in. ...................................................... .25 2.00

STACHYURUS

Stachyurus praecox. 12 ft. Flowering shrub from Japan, producing bell-shaped yellow flowers in racemes to 3 inches long. Greenish yellow fruit. Blooms in February and March.

Each 10
2 to 3 ft. ...................................................... $1.00
18 to 24 in. ...................................................... .75

STEFANANDRA

Stephanandra flexuosa (Cutleaf Stephanandra). 8 ft. A very graceful and desirable shrub from Japan and Korea, with spreading, drooping branches. Leaves serrated. White flowers in soft feathery racemes are produced in May.

Each 10
2 to 3 ft. ...................................................... $ .50 $ .50

STEWARTIA

Stewartia monadelpha (Japanese Stewartia). In Japan growing to 80 ft. In cultivation perhaps a tall shrub. Large, single, white flowers with violet anthers in late spring.

Each 10
4 to 5 ft. ...................................................... $5.00
SYMPHORICARPOS
Snowberry (St. Peter's Wort)
Symporicarpus chenaulti, 3 ft. The most desirable Snowberry. Graceful; compact; small foliage. Bears fruit of white to pink color. Of hybrid origin.

S. racemosus (Common Snowberry). A very graceful shrub, growing to 6 ft. tall, with slender drooping branches. Flowers white, followed by clusters of white berries which remain upon the plant for months. A native to North America.

S. vulgaris (Coralberry). 4 ft. A native shrub growing naturally from New York to Texas. Purplish red berries, produced in great profusion, remain upon the plant all winter, making it especially desirable for landscape planting.

WEIGELA  Diervilla

Hardy, profuse-blooming shrubs of spreading habit. Among the best of the garden shrubs, producing in early April great masses of showy flowers.

Weigela hybrida candida (Snow Weigela). 6 ft. Pure white. Excellent.

W. hybrida, Eva Rathke. 6 ft. Flowers deep carmine-red. Profuse bloomer and continues in bloom for a long time.

W. hybrida, Mt. Blanc. 6 ft. Blooms similar to Candida, except that flowers at first are white, later turning to light pink.

W. rosea (Pink Weigela). 6 ft. Flowers are light pink. Compact grower; free bloomer.

W. rosea variegata. 6 ft. Flowers pink. Foliage white and green variegated.

I am enclosing an order for seven of your choice roses. I have been growing roses and shrubbery from your nursery for 30 years and I find them so very satisfactory.

Mrs. E. B. D., Orangeburg, S. C.
3/7/35
FRUITLAND GROWN TREES

"I Think I Shall Never See a Poem as Lovely as a Tree" For Shade and Flower

• FRUITLAND NURSERIES, realizing that here in the South it is almost imperative that we have shade trees, grows an unusually large variety. Certain of these varieties will not grow tall enough for much shade, their merits being beautiful foliage, as in the Red Leaf Maple; lovely flowers in the Dogwoods; tall screens or accents with the Lombardy Poplars. With FRUITLAND trees you may have wonderful shade; magnificent flowers; glorious autumn coloring in foliage and fruit, and the grotesque with certain weeping trees.

The figures after each name denote ultimate height of plant.

Acacia (Mimosa). See Albizia.

ACER . Maple

Acer palmatum atropurpureum (Japanese Red-Leaf Maple). 25 ft. Foliage and shoots colored bronzy-red. Should be planted in a protected position where it will not receive the hot afternoon sun. Rather a shrub in the South.

Each
2 to 3 ft. $1.00
18 to 24 in. 2.00

ALBIZZIA . Mimosa

Albizia julibrissin (Acacia julibrissin; Silk Tree). 20 ft. A rapid-growing tree with spreading branches and a low, flat-topped head. Foliage fine and feathery. The large heads of pink flowers are borne at tips of branches the middle of May and continue for several weeks. A native of Persia and Japan, but naturalized in the South.

Each 10 100
8 to 10 ft. 2.00 $17.50 $150.00
6 to 8 ft. 1.50 12.50
5 to 6 ft. 1.00 8.50
4 to 5 ft. .50 4.50
3 to 4 ft. .35 3.00

ALEURITES . Tung-oil Tree

Aleurites fordii. 30 ft. A medium-sized tree indigenous to central China. The rather large, apricot white flowers, which appear in large numbers in April, with the broad, handsome, green leaves following, making the tree a valuable ornamental. It thrives best in well-drained and sand-clay loams. The tree is reported to live to the age of thirty years or more. Its apple-like fruits contain several large nut-like seeds which yield the valuable tung-oil or China wood oil of commerce, used exclusively in paints and varnishes.

Each 10 100
6 to 8 ft. $1.25 $10.00 $80.00
5 to 6 ft. .75 6.50 50.00
4 to 5 ft. .50 4.50 35.00
3 to 4 ft. .35 3.00 25.00
2 to 3 ft. .25 2.00 15.00

AMYGDALUS . Flowering Peach

During March the Flowering Peaches are covered with a mass of beautifully formed and highly colored double flowers. These trees cannot be too highly recommended for early spring blooming. Perfectly hardy, thriving in any soil in which other Peaches grow.

Amygdalus persica albo-plena. 12 ft. White; double.
A. persica carnea flore-plena. 12 ft. Pink; double.
A. persica rubro-plena. 12 ft. Red; double.

All Amygdalus: Each 10
1-yr., 4 to 5 ft., extra heavy. $1.00 $9.00
1-yr., 2 to 3 ft., well branched. .50 7.50

CERASUS (Flowering Cherry). See Prunus.

CERCIS . American Redbud

Cercis canadensis. 30 ft. A fast-growing, round-headed tree with large, leathery, heart-shaped leaves. The last of March, before the foliage appears, the tree is covered with a profusion of delicate reddish purple flowers.

Each 10
8 to 10 ft. $1.50 $10.00
6 to 8 ft. 1.00 9.00
5 to 6 ft. .75 6.50
4 to 5 ft. .50 4.50

C. canadensis alba. 30 ft. Same as Cercis canadensis, except flowers are white.

Each 10
4 to 6 ft. $3.00
3 to 4 ft. 1.50
2 to 3 ft. 1.00

CORNUS . Dogwood

Cornus florida (Flowering Dogwood). 40 ft. The native, large, white flowering Dogwood. A most effective plant for the lawn.

Each 10
6 to 8 ft. $2.50 $12.50
5 to 6 ft. 1.50 9.00
4 to 5 ft. .75 6.50
3 to 4 ft. .50 4.50
2 to 3 ft. .25 2.00

Each
3 to 4 ft. $2.00
2 to 3 ft. 1.50

C. florida rubra (Red-flowering Dogwood). 25 ft. Similar to the White-flowering Dogwood, but the flowers are of a deep rose color. Early in the season it produces large quantities of blooms, making it a most effective tree for single specimens on the lawn, and for mass planting with a background of tall evergreens. It is considered one of our outstanding flowering trees.

Each
5 to 6 ft. $6.00
4 to 5 ft. 4.00
3 to 4 ft. 2.75
2 to 3 ft. 2.00
18 to 24 in. 1.00

**MELIA . China Tree**

**MALUS . Flowering Crab-Apple**

The Flowering Crab can be planted as specimens on the lawn or in masses, either in the border or open lawn.

Malus ioensis bechetic (Bechtel Double-flowing Crab). 8 ft. The flowers of this sweet-scented Crab resemble small pink roses. Very hardy and good for individual planting. 2 to 3 ft. $1.00 each.

M. atrorugosus (Carmine Crab). 8 ft. Single, carmine flowers that fade to a light pink. Very showy. 2 to 3 ft. and 3 to 4 ft. $2.00 each.

M. floribunda. 8 ft. Single; pink; early. Spreading. Yellow fruit slightly tinted red. 2 to 3 ft. $1.00 each.

M. halliana parkeri (Parkman Flowering Crab). 8 ft. Rose-colored buds and pinkish white flowers when open. Dwarf habit. A good variety for group and mass planting. 2 to 3 ft. 3 to 4 ft. and 4 to 5 ft. $4.50 each.

M. kentukea (Scheidbeck Crab). 2 to 3 ft. Upright grower, with small, pink flowers in great profusion. 2 to 3 ft. only. $2.00 each.

M. spectabilis (Chinese Double-flowing Crab). 8 ft. A small-sized tree, producing a wealth of delicate, double pink flowers in early April. $1.50 each.

**THE SOUTH'S OLDEST NURSERY**

AN ORCHARD, FLOWER GARDEN, HEDGE-BORDERED LAWN, VINEYARD—A SETTING THAT WILL MAKE A SHANTY EQUAL TO A MANSION
The South's Oldest Nursery

**POPULUS . Poplar**

*Populus nigra italica* (Lombardy Poplar). 40 to 50 ft. The well-known Italian variety. A tall, pyramidal, compact and rapid-growing tree, extensively planted in the southern part of Europe. Very desirable where a formal effect is wanted.

*Populus simoni fastigiata* (Simon Poplar). 40 to 50 ft. A remarkable variety of the small-leaf Chinese Poplar. Of pyramidal habit, resembling the Lombardy, but making a more pleasing impression. A rapid grower.

**PRUNUS . Flowering Cherry and Plum**

There is no group of exotic trees as handsome as the flowering cherries and plums. The Purple Leaf Plum is the handsomest of all the highly colored foliaged plants in the South. The Japanese Weeping Cherry is particularly beautiful planted at the end of walks or on the sidewalks. On page 7 you will find listed the Prunus mume, or Japanese Apricot, which is one of the earliest bloomers of all the shrubs—frequently in full bloom in the coldest part of the winter.

*Prunus nipponica plena.* (Double-flowering Cherry). This is a remarkably fine tree. In early spring it produces a wealth of pure, double white flowers which are frequently so numerous that they conceal the branches; each individual flower resembles a miniature rose.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

*P. cerasifera pissardi.* (Purple-leaf Plum). 10 to 20 ft. The most valuable of all purple-leaved trees. It retains its deep color throughout the warmest weather and its leaves last until mid-winter. We cannot endorse it too highly. 4 to 6 ft., 75c each; $6.50 for 10.

**QUERCUS . Oak**

All of our Oaks have been several times transplanted and, therefore, have a good root system. Oaks must be severely pruned when transplanted, otherwise there is danger of the tree dying. The average person considers the Oak a very slow-growing shade tree. Fortunately, this is not the case, as growth is as rapid on these trees, considering their longevity, as it is on the average shade tree.

**EVERGREEN OAKS—**See page 22.

*Quercus alba.* (White Oak). 50 to 100 ft. A beautiful variety with spreading branches, broad, open head, and light gray bark. The foliage assumes a deep purple tint in fall. One of our finest Oaks, and very desirable for street and lawn planting.

*Quercus nigra.* (Water Oak). 50 to 80 ft. Too well known to need description.

*Quercus palustris.* (Pin Oak). 50 to 80 ft. Tree shapely and symmetrical. Leaves are a beautiful shade of green in autumn turning to a brilliant scarlet. One of the most desirable trees for street and avenue planting.

*Quercus phellos.* (Willow Oak). 50 to 80 ft. A graceful variety with narrow lanceolate leaves, resembling those of the willow. Well-known native tree, but extremely difficult to secure.

*Quercus rubra.* (Red Oak). 50 to 80 ft. Hardy from New Jersey to Florida and Texas.

BROAD-LEAVED EVERGREENS

A Specialty of Fruitland Nurseries

No Where in the South can one find such an array of Beautiful Broad-Leaved Evergreens as at Fruitland's

A view of some of our Broad-leaved Evergreens.

- Modern home-plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broad-leaved Evergreens. They are needed for the green foliage which gives color all the year, especially in the winter when warmth and color are demanded. There is need for them in all plantings, particularly in the outdoor living-room where they lay great claim to everyday beauty.

FRUITLAND NURSERIES has an unusually large collection of Broad-leaved Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous, and healthy specimens. Some varieties do not transplant successfully from open ground, and therefore these are carefully grown in pot-form, thus assuring success when removed to your home.

The figure after each name denotes ultimate height of plant.

ABELIA

Abelia grandiflora (Glossy Abelia). 6 to 8 ft. One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. Pinkish white blossoms produced all summer. For single specimens, for groups, or for a hedge. Hardy as far north as Philadelphia, and has been grown successfully in sheltered positions in Massachusetts. Even when partially killed back, young shrubs flower profusely the same season.

ACACIA . Opopanax

Acacia farnesiana (Sweet Acacia). 20 ft. A popular Southern plant, with thorny branches and very small leaflets. The fragrant flowers, which look like yellow balls, are produced freely in February and March. A popular Northern greenhouse plant, where it blooms freely all winter. Strong, potted plants. $1.00 each.

ASPIDISTRA

Aspidistra elata. A stemless plant. Leaves 2½ ft. long and 4 in. across. A Chinese plant, belonging to the Lily family. Ideal for porch or window boxes. Will stand rough usage and dense shade. Needs very little light. Each Clumps, 8 to 10 leaves $0.75

AUCUBA . Gold-Dust Tree

This beautiful plant is not sufficiently appreciated. In the open ground it gives the best results if planted in a shaded situation, in a somewhat moist, though rich, well-drained soil. Aucubas are especially desirable for city gardens as they are seldom injured by smoke or noxious gases. These plants are also largely used for vases, urns and window-boxes. Hardy at Washington, D. C.

Aucuba japonica (Japanese Aucuba). 8 ft. A strong-growing variety with large, dark glossy leaves. Each 10

AZALEAS

AZALEA INDICA . Indica Azaleas

FRUITLAND NURSERIES, being at the northern limit where Indica Azaleas may be grown out of doors successfully, makes our plants much more hardy than the rapid grown Azaleas from the coast and Gulf. We quote a letter from one of our customers in northern Louisiana: “I have found Azaleas from your place to be the only ones to have come through the freeze uninjured. Please quote me on 10 Iveryana.’

These beautiful shrubs are perfectly hardy in the open ground in the South, and by carefully selecting varieties a continuous supply of blooms may be had from January to May. Planted in masses of solid or well-contrasting colors, a pleasing effect is secured.

To get the best results, Azaleas should be planted in a slightly shaded location, and particular attention should be given to protecting them from the hot afternoon sun. The soil should contain an abundance of leaf-mold, peat, and sand, and should be well drained. Azaleas will not succeed in limestone soil. Mulching with decayed leaves, preferably those of hardy trees, is a distinct advantage. If the plants are grown in pots they should be repotted after flowering before the new growth begins; keep the plants sheltered for a few days and then plunge the pots into the open ground in a shady situation.

A group of Azalea indica (Fruitland) at the home of Mr. and Mrs. Josiah T. Clarke, Augusta, Ga.

FRUITLAND NURSERIES’ AZALEAS are more compact, giving you more flowers, making them ideal for pot culture. Native host plants and a lack of water will subject Azaleas to attacks of red spider and lace fly. These insects usually hatch in May, and the plant should be sprayed with Black-Leaf 40 at the rate of 3 teaspoonfuls to 1 gallon water, and 2 to 3 teaspoonfuls of soap flakes to each gallon to act as a spreader. If the plants are seriously infested, spray at intervals of ten days, but usually a spraying in May and again in September will control the pests. Be sure that the underside of the leaf is thoroughly wet with the material. Immediately after new growth begins in spring, a few leaves will have “apples” on them; these cause no material damage, but should be picked off.

Peat is a splendid mulch for Azalea-beds, as it retains the moisture. No cultivation is required, for the roots are very near the surface of the soil.

We offer several thousand Indica Azaleas in about 50 varieties, and in the sizes here indicated.

PINK AND SALMON COLORS

Creminea, tall, early, soft pink, 6-8 in. to 15-18 in.

Duke de Rohan, medium, midseason, salmon, 6-8 in. to 18-24 in.

Duke of Wellington, medium, late, salmon, 6-8 in. to 12-15 in.

Elegans Superbæ, tall, midseason, large pink, 6-8 in. to 18-24 in.

George Franc, medium, early, pink, 6-8 in. to 18-24 in.

Himal. medium, late, clear pink, 12 in. to 2-3 ft.

Ind. de Marc, medium, early clear pink, 18-24 in. and 2-3 ft.

Salmon Pink, dwarf, very late, and hardy, 6-8 in. to 15-18 in.

Wm. Bull, tall, midseason, double brickdust, 6-8 in. to 2-3 ft.

RED, including Orange-red and Deep Pinks

Brilliant, tall, late carmine, 6-8 in. to 15-18 in.

Coccinea Major, dwarf, late, orange-red, 6-8 in. to 12-15 in.

Glory of Sunninghill, dwarf, very late, scarlet, 6-8 in. to 12-15 in.

Præstantissima, tall, midseason, deep pink, 6-8 in to 24-30 in.

Prince of Orange, medium, late, orange-scarlet, 6-8 in. to 15-18 in.

LAVENDER

Formosa, tall, midseason, lilac, 6-8 in. to 3-4 ft.

Phoenicea, medium, late, lavender, 6-8 in. to 3-4 ft.

Violaecæ Rubra, tall, wine-red, late, 6-8 in. to 2-3 ft.

Vittata Fortunei Purpurea, tall, early, lavender, hardy, 15-18 in. and 15-24 in.

VARIEGATED

Criterion, dwarf, late, pink and white, 6-8 in. to 15-18 in.

Iveryana, dwarf, variable, pink and white, sometimes solid, 6-8 in. to 2-3 ft.

Mme. Dominique Vervaine, tall, midseason, white, lavender pink throat, 6-8 in. to 2-3 ft.

Mme. Margottin, medium, late, almost solid white with few pink dots, 6-8 in. to 2-3 ft.

Vittata Fortunei, tall, very early, one of the hardiest and best. Colors resemble peppermint candy, 6-8 in. to 3-4 ft.

WHITE

Fielders White, tall; early flowering; pure white. Hardy, 6-8 in. to 12-15 in.

Flag of Truce, medium, midseason, double white waved petals, 6-8 in. to 18-24 in.

Indica Alba, medium, white, and hardy, 6-8 in. to 15-18 in.

Sunninghill, medium, late, hardy, 6-8 in. to 15-18 in.

In addition to this select list of varieties, we grow in limited quantities all of the varieties which are satisfactory in this latitude, and invite requests for varieties not listed above.

AZALEA KAEMPFERI HYBRIDS

We have been trying to get a hardy type of tall growing Azaleas, combining the colors of the Indica type with the hardiness of the Kaempferi type. In this we seem to have
AZALEAS—Continued

succeeded. These hybrids came through the same winter cold as the 36-38 those of the
perature dropped to 7°F. above zero, with
only slight injury to one-year-old plants—
uring to early plants. These hybrids are
in all shades of pink, red, salmon and lav-
der, flowering at the same time as Ku-
eres. We offer this season several thou-
ds of these hybrids in mixed colors only.
As all Azaleas may be safely trans-
planted while in bloom, we can send you
any of these hybrids as soon as color

AZALEA KURUME
Azalea Obtusum Japonicum

The parent plant of these charming, hand-
some, hardy hybrid Azaleas came from the sacred
Mount Kiriishima in Japan. They have been
cultivated for about 100 years in the city of
Kurume in the Island of Kyushu in Japan. It is
only for the past 20 years that we, in America, have had the pleasure of
knowing these exquisite flowers. Ht., 3 ft.
Amena. Small, small foliage hose-in-hose, clas-
less; young plants to 15 in. to 18 in. in
Bridesmaid. Glowing salmon flowers pro-
duced in large clusters; very prominent stamens; small green foliage.
6 to 8 in. to 15 in. to 18 in.
Christmas Cheer. Hose-in-hose; crimson.
Glossy foliage. 6 to 8 in. to 12 to 15 in.
6 to 8 in. to 15 in. to 18 in.
Daybreak. Pure light pink flowers in dense
clusters; very free-flowering. Beautiful
green foliage. 6 to 8 in. to 15 to 18 in.
Flame. Brilliant red, with coppery suffu-
sion; beautiful, medium-sized flowers.
Glossy foliage. 6 to 8 in. to 18 to 24 in.
Hedge. Midseason. Hose-in-hose, deep red
color. Large flower, low, dense grower.
6-8 in. to 10-12 in.
Hinodegiri. Single; red. Late. 6 to 8 in.
Hinodegiri. Single; salmon; larger
flowers than the others. Said to be not a true
Kurume; midseason. 6 to 8 in. to 16 to 18 in.
Pink Pearl. Hose-in-hose; delicate apple-
blossom-pink. Late. 6 to 8 in. to 18 to
Salmon Beauty. Midseason. Large, hose-
in-hose; free flowering. Foliage light
green. 6 in. to 12-18 in.
Salmon Queen. Lovely shade of salmon-
pink, with large individual flowers. Hose-
in-hose type. Light green foliage. 6 to
8 in. to 15 to 18 in.
Snow (Swan). Hose-in-hose; white. Mid-
season. 6 to 8 in. to 10 to 12 in.
Sunstar. Single, medium-size red blooms.
rather open-growing. 6-8 in. to 15-18 in.

BERBERIS . Barberry

Berberis atropurpurea. 6 ft. A very handsome, densely branched plant, having dark green leaves and bright yellow flowers in May. It is a native of western China by the late E. H. Wilson. 12 to 15 in., 75c.

B. potanica. A very beautiful low-growing barberry, with margins of leaves crinkled. Does not bear flower the winter the leaves take a purple tint.

B. prunifolia. 6 ft. Vigorous growing shrub with long spiny foliage, and con-
spicuous berries covered with a whitish bloom.

B. triacanthophora (Three-spire Barberry). An unusual type from China, having thorny toothed leaves. Very graceful.

BUXUS . Box

Buxus sempervirens (Common Tree Box). 25 ft. Pyramidal form, suitable for boxes or urns.

B. sempervirens sufruticosa (Trudward Box). We have a nice lot of these popular plants in sizes suitable for boxes, urns and hedges. Each

The South's Oldest Nursery}

Page 15

Camellia japonica—One of Fruitland's Specialties

- It is with considerable satisfaction that we look back over the history of Fruitland Nurseries and note that we were among the pioneers in bringing the exquisite Camellia japonica to Southern

gardens. Even today it is a common thing to find Camellias fifty to sixty years old that originally came from our nurseries. Camellias, familiarly known as "Camellias," are important plants in Southern
gardens, and Fruitland Nurseries have given special attention to propagating the older varieties, as well as selecting the desirable new introductions. At the present time we grow about 80 distinct sorts and varieties in the history of the

firm have we had such a superb

collection. Because of the scarcity of certain varieties we have only a few plants on hand and these are not here listed.

Should you not know the name of the variety that you wish, please send us a photo so that we may be able to indicate whether the variety is in our collection or not. We have been very successful in pleasing our customers and hundreds of orders of

this kind are filled each season.

A Trio of Unusual Varieties

EMPRESS (Grandiflora rosea). Immense, semi-double, almost single, light pink flowers.

KUMASAKA (Lady Marion). Formation of flower similar to Horne, but a solid deep pink.

LADY HUMES BLUSH. Very rare in this true double imbricated white, suffused with pink. Also known as Buff, Incarnata and Ella Drayton.

Cultivation of Camellia Japonica

Camellias will grow in full sun if protected for the first few summers with a lattice from frost. However, an ideal place for planting is where the plants get only a half day's sun. Do not plant in full shade, as they will not blossom as freely. In

planting, the holes should be dug large. If the soil is not fertile, use the following mixture: one-half good garden soil, one-fourth well-rotted cow manure; one-fourth peat or leaf-
mold, well mixed. After planting, mulch with half-rotted leaves or peat. Each spring Camellias should be fertilized with well-rotted cow manure, bone-meal and Vigoro or Loma. Always keep the plants well mulched and

watered. The first two summers after planting are very trying on the plants and often prove disastrous unless these two simple things are done; watering and mulching.

The foliage is sometimes attacked by a scale insect, which may be readily controlled by spraying in January with Scaledic—1 part to 15 parts water.

Group No. 1

Alba Plena. Double perfect white. 8 to 12 in. to 12 to 15 in.

Chandleri elegans. Semi-double deep pink and white; loose peony center.
GROUP NO. 1—Continued

On large plants of this variety one will have solid deep pink blossoms. On some blossoms pink will predominate—others white. The formation of the blossoms vary to a great degree also. 8 to 12 in. to 24 to 30 in.

Civiana. Solid pink, peony form. 8 to 12 in. to 18 to 24 in.

Colletti Maculata. Semi-double blood red and white. 8 to 12 in. to 15 in.

Comte de Comer. Double white, pink streaks. 8 to 12 in. to 30 to 36 in.

Countess Lavinia Maggi. There is some dispute over the name of this variety, but for the time being we shall send this variety out under this name. The large foliage is a lustrous dark green. Very large semi-double red and white blossoms. 8 to 12 in. to 12 to 15 in.

Enrico Bettoni. Loose semi-double pink, yellow stamens interspersed among the heavy petalage. One of the best varieties. 15 in. to 30 to 36 in.

Fruitland Nurseries 
Augusta, Georgia

Camellia illustrated in color on front cover:

No. 1. GIGANTEA (Magnolia King).

No. 2. FRAU MINNA SEIDEL (Pink Perfection).

No. 3. MRS. LUEMAN.

No. 4. SWEETI VERA.

No. 5. MATHOTIANA RUBRA (William S. Hastie).

NOTE

In many varieties of Camellias we have larger size plants not listed in our catalog. Write for prices.

Sweeti Vera. Exquisite; large; semi-double white with markings of delicate pink. Occasionally sporting a solid delicate pink blossom. This variety should be in every collection of Camellias. 8 to 12 in. to 3 to 4 ft.

Tricolor Sieboldi. Semi-double variegated. 8 to 12 in. to 3 to 4 ft.

Tricolor Sieboldi, Red. A solid red variety of the above. 8 to 12 in. to 24 to 30 in.

Tricolor Sieboldi, White. A pure white variety of the above. 8 to 12 in. to 12 to 15 in.

Variabilis. Semi-double pink and white. 8 to 12 in. to 30 to 36 in.

CAMELLIAS
FROM MAGNOLIA GARDENS

From the world-famous garden, near Charleston, S. C., comes these rare and exquisite varieties:

Gigantea (Magnolia King). Very large, thick, dark green foliage, with semi-double red and white flowers. 8 to 12 in. to 24 to 30 in.

Matthotiana Rubra (Wm. S. Hastie). Handsome, shining foliage and enormous double flowers opening to semi-double red. 8 to 12 in., 12 to 15 in.

Rev. John Bennett. This is the true variety from the famous Magnolia Gardens. Semi-double, almost single, salmon-pink, with a cluster of yellow stamens. 8-12 in., 12-15 in., 18-24 in. and 24-30 in.

Sara C. Hastie (Debutante). Another of the Magnolia Gardens creations. Very early flowering peony-type blossoms; very delicate pink. 8-12 in. to 18-24 in.

GROUP NO. 2

Althaeflora. Semi-double, dark crimson. 8 to 12 in. to 30 to 36 in.

Feasti (Kenchiu). Double pink and white, sometimes solid. 8 to 12 in. to 3 to 4 ft.

Imbricata Rubraplena (Carlotta Grissi). Double deep carmine. 8 to 12 in. to 12 to 15 in., 18 to 24 in. to 30 to 36 in.

FRUITLAND OFFERS A SELECT VARIETY OF FRUIT TREES

ERIOBOTRYA . Loquat (Japan Medlar)
Eriobotrya japonica. 15 ft. This Chinese evergreen is very striking, having thick corrugated leaves to 1 ft. long. Fragrant flowers in panicles produced in December and January. Here it seldom sets fruit.

CINNAMOMUM . Camphor Tree
Cinnamomum camphora. 40 ft. A native to China and Japan. Hardy in the far South where it makes a sizeable tree. At Augusta it frequently freezes to the ground, but will come out and make rapid growth in one season. Each Strong plants from pots. $0.50

CLEYERA
Cleyera ochracea (C. japonica). 20 ft. A slow-growing plant related to the Camellias and requiring the same treatment. New foliage reddish, turning a glossy green. Shrub will soon light up with lovely clusters of creamy white blossoms in July and August, followed by showy red fruits which are retained all winter. One of the better evergreens, and all too little used. Native to Japan.

COTONEASTER
Cotoneaster horizontalis (Rockspray; Prostrate Cotoneaster). 3 ft. An evergreen spreading plant suitable for terraces, walls, and rock-gardens. $2.50, followed by brilliant red fruits throughout the winter.

C. microphylla. 3 ft. A low-growing prostrate shrub. Dark green, oval leaves. Bright red fruit.

ELAEAGNUS . Japan Oleaster
Elaeagnus pungens. 10 to 15 ft. Leaves 2 to 4 inches long, very dark green above, silvery beneath; margin of leaf undulating. Creamy white, fragrant flowers produced in November. A beautiful shrub.

E. pungens Fruitlandi. 10 to 15 ft. A variety originated at our Nursery. Evidently a cross of E. macrophylla and E. pungens simoni. Leaves large, pointed, beautiful silver beneath. This is a very fine addition to our broad-leaved evergreens.

E. pungens reflexa (Climbing Elaeagnus). 10 to 15 ft. Will climb to top of fences and unsightly trees, making a dense screen. Birds delight to nest in these plants. Fragrant blossoms in November, followed in March by edible red fruits.

E. pungens simoni (Simon’s Oleaster). 10 to 15 ft. Foliage elongated, silvery on under side. Plant compact in growth. Fragrant blossoms in November, followed in March by edible red fruit.

E. pungens variegata. 10 to 15 ft. Leaves very light green, margin yellowish white. Produces, in March, fruit about size of Cranberry.

All above Elaeagnus:

Regular Value: $4.75
ILEX . Holly—Continued

   Each 10
   18 to 24 in., very bushy $2.00 $17.50
   15 to 18 in., very bushy 1.50 12.50
   12 to 15 in., very bushy 1.00 8.50
   10 to 12 in., very bushy .75 6.00

1. glabra (Inkberry). 8 ft. Native blackberry variety.
   Each 10
   2 to 3 ft. $1.50 $10.00

1. integrifolia (Othersa japonicas). 20 ft. This Japanese species is the most distinct of any Hollies, having light green, oval, spineless leaves. Red berries produced on large plants.
   Each 10
   2 to 3 ft. $2.50
   18 to 24 in. 2.00 17.50

1. latifolia (Tara or Magnolia-leaved Holly). 25 ft. This is the largest foliage of any Holly, having leaves as large and as lustrous as the Southern Magnolia, growing in the Southern part of Japan to trees 50 to 60 feet tall. In cultivation it will perhaps reach half this height. Very rare.
   Each 2
   2 to 3 ft. $4.00
   18 to 24 in. 3.00
   15 to 18 in. 2.00

   Each 10
   4 to 5 ft., specimens $5.00
   3 to 4 ft. 3.00 27.50
   2 to 3 ft. 2.00 17.50
   18 to 24 in. 1.00 6.50

1. opa xanthocarpa (Yellow-berried variety of above).
   Each 10
   18 to 24 in. $2.00

1. vomitoria (Yaupon). 20 ft. A native shrub with spreading branches and small, oval or oblong leaves. Most effective when planted in clumps. Small red berries freely produced. Ideal for hedges.
   Each 10
   6 to 8 ft. $5.50
   5 to 6 ft. 4.00
   4 to 5 ft. 3.50 22.50
   3 to 4 ft. 2.50 22.50
   2 to 3 ft. 1.50 12.50

ILLICIUM . Anise Tree

Illicium anisatum (Japanese Anise Tree). 15 ft. A handsome evergreen with broad, light green leaves which, when bruised, emit an anise fragrance. Very desirable.
   Each 10
   4 to 5 ft. $2.75 25.00
   3 to 4 ft. 2.00 17.50
   2 to 3 ft. 1.50 12.50
   18 to 24 in. 1.00 8.50
   12 to 18 in. 0.50 4.00

KALMIA . American Laurel

Kalmia latifolia (Mountain Laurel). 10 to 12 ft. A beautiful, native broad-leaved evergreen shrub, often attaining the size of a small tree. Its thick, waxy leaves are retained the year round, giving a striking effect. The pink and white geometrically shaped buds appear and expand into beautiful white and flesh-colored flower cups. Of greatest value for massing, making a handsome effect in the landscape. All from open ground. Each 10
   18 to 24 in., extra-strong clumps $2.00 $17.50
   12 to 18 in., extra-strong clumps 1.50 12.50

LAUROCERASUS

Cherry Laurel

Laurocerasus confusa (Prunus confusa; Carolina Cherry Laurel). 20 ft. Desirable as a single specimen or for grouping, as it makes a most effective background in landscape work. Can also be pruned in standard, pyramidal, or other formal shapes.

All plants from open ground. Each 10
   4 to 5 ft., heavy, bushy, B&B $3.00 $27.50
   3 to 4 ft., heavy, bushy, B&B 2.25 20.00
   4 to 5 ft., bare roots 1.75 15.00
   3 to 4 ft., bare roots 1.00 9.00

Sheared Plants:
   Each 10
   4 to 5 ft., B&B $6.00
   3 to 4 ft., B&B 4.00
   2 to 3 ft., B&B 3.00

See page 28 for hedge plants.

L. officinalis (English Cherry Laurel). 20 ft. The principal merit of this is its great vigor and beautiful, broad, shining foliage, easy cultivation, thriving in any ordinary, good, well-drained garden soil. Not hardy north of Washington, D.C. The plants do not bloom until they are several years old, when they produce spikes of small white flowers. For massing or for single specimens, few plants possess more advantages than the English Laurel.
   Each 10
   4 to 5 ft. $3.00
   3 to 4 ft. $2.50
   2 to 3 ft. 2.00 17.50

LIGUSTRUM . Privet

PLEASE NOTE that heretofore Ligustrum japonicum and Ligustrum lucidum have been incorrectly named. That which was called Japanicium is really Lucidum, and that called Lucidum is Japonicum. The Lucidum is tall growing, and the Japonicum is low growing.

FRUITLAND NURSERIES is happy that they were the first nursery in America to correct this error. Ligustrums are a group of plants which are indispensable to Southern plantings.

Ligustrum japonicum (Japanese Privet). 15 ft. A beautiful form of Japanese Privet. Leaves large, thick, ovate, lancelate, of a very dark shining green. Large heads of white flowers produced in May, followed by black berries, which are retained throughout the winter. Hardy at Baltimore. A most desirable variety.
   Each 10
   3 to 4 ft., specimens $3.50
   2½ to 3 ft., well branched 2.50 22.50
   2 to 2½ ft., well branched 1.50 12.50
   18 to 24 in., bare branches 1.00 9.00
   15 to 18 in., well branched, bare roots .75 6.50
   12 to 15 in., well branched, bare roots .50 4.50

L. japonicum coriaceum. 10 ft. Unique and slow growing, with curling, stiff, dark green foliage. Each 10
   18 to 24 in. $1.50 $12.50
   15 to 18 in. 1.25 11.00

L. lucidum (Glossy Privet). 25 ft. A handsome, broad-leaved variety, with large, dark green leaves. Flowers produced in panicles, followed by purple berries which are retained during the winter, giving the plant a very pleasing appearance. This plant can be grown into a small tree, or trimmed into pyramidal, standard, or other forms.
Fruitland Nurseries * Augusta, Georgia

LIGUSTRUM—Continued

L. lucidum aureum (Golden Privet). 25 ft. Same as L. lucidum, except that the leaves are golden.

Above two Ligustrums: Each 10
4 to 5 ft., specimens ............................ $2.50 $22.50
3 to 4 ft., well branched ........................ 1.50 12.50
2 to 3 ft., well branched ........................ 1.00 8.50
18 to 24 in., well branched .................... $.75 6.50

L. lucidum Standards. 8 ft. These trees have heads trained on a single stem, suitable for tubs or formal planting.

18 to 24 in., heads, 3 to 4 ft. stems ............ Each $2.50

L. lucidum excelsum superbum (Silver-leaf Privet). 20 ft. Leaves large, beautifully variegated white and green. Stands sun to perfection. In winter the dark purple berries are very effective.

L. lucidum marginatum aureum (Goldleaf Privet). 20 ft. A vigorous growing variety with large leaves beautifully margined with yellow. Stands the sun well. In winter the large bunches of purple berries, combined with the yellow foliage, make a very striking effect.

Above two Ligustrums: Each 10
4 to 5 ft., bushy specimens ..................... $3.00
3 to 4 ft., bushy specimens ..................... 2.00 $17.50
2 to 3 ft., well branched ....................... 1.50 12.50

LONICERA . Honeysuckle

Lonicera belgica (Dutch Woodbine). 6 ft. Pink flowers in great profusion in spring; blooms again in late summer and continues until frost. One of our finest flowering shrubs. Of semi-climbing habit, but can be easily grown in bush form.

Above Lonicera: Each 10
2 to 3 ft. ........................................... $.75 $6.50
18 to 24 in. ....................................... $.50 4.00

MAGNOLIA

Magnolia grandiflora (Southern Magnolia). 50 ft. The grandest of all our native broad-leaved evergreen trees. It is a native of the middle sections of the Southern States, and succeeds best in a rich soil. Nothing more conspicuously can be seen among evergreens when its large, white flowers are fully expanded. Their period of blooming begins in the middle of April and lasts until August. Hardy at Philadelphia.

Each 10
6 to 8 ft., B & B ................................. $6.50
5 to 6 ft., B & B ................................. 5.00
3 to 5 ft., B & B ................................. 3.00
3 to 4 ft., bare roots .......................... 2.00 $17.50
2 to 3 ft., bare roots .......................... 1.00 8.50
18 to 24 in., bare roots ......................... $.75 6.50

M. grandiflora gloriosa. 50 ft. Large flowers, often 12 to 15 inches in diameter. Foliage large, bronze underneath. M. grandiflora victoria. 50 ft. Differing in M. gloriosa only in shape of leaves, which are long and narrow and without the bronze color underneath. The size of flowers are same in both varieties.

Above two Magnolias: Each
2 to 3 ft. ............................................ $2.00
18 to 24 in. ..................................... 1.00

NOTE—To lessen liability of loss from transplanting, leaves will be removed, unless we are instructed to the contrary. Our Magnolias have been twice transplanted and have finely branched roots.

MAHONIA . Holly Grape

Mahonia bealei (Leatherleaf Holly Grape). 6 ft. A Japanese Berberry. Leaves very broad, with five pairs of leaflets. Flowers yellow, in long spikes, during the first three months of the year, followed by dark purple berries. A magnificent evergreen. This splendid plant thrives in almost any situation, but does best in a partially shaded location, where the ground is well drained. Hardy at New York in protected situations.

Each 10
2 to 2½ ft. ........................................... $2.50 $22.50
18 to 24 in. ..................................... 2.00 17.50
15 to 18 in. ..................................... 1.50 12.50
12 to 15 in. ..................................... $.75 6.50

MICHELIA . Banana Shrub

Michelia fuscata (Magnolia fuscata; Banana Shrub), 20 ft. In the South one of our most popular and desirable evergreen shrubs. From early April until June the plant produces a quantity of yellowish white flowers, edged with maroon. The banana-like fragrance is so pronounced that it is recognized several yards from the plant. A desirable conservatory shrub in the North.

Each 10
3 to 4 ft., specimens ........................... $5.00
2 to 3 ft. ........................................... 3.00 $27.50
18 to 24 in. ..................................... 2.00 17.50
15 to 18 in., from pots ......................... 1.00 9.00
12 to 15 in., from pots ......................... $.75 6.50

MYRTUS . Myrtle

Myrtus communis (True Myrtle). 10 ft. South European, aromatic foliaged white summer flowering shrub. Tender here while young.

12 to 18 in. ....................................... $1.00

FRUITLAND SPECIAL COLLECTION, NO. 6

1 Sprucea Billardi, 12-18 in. .................. $ .35
1 1. Michelia fuscata, 12-15 in. ................ .75
1 1. Viburnum tinus, 12-15 in. ................ 1.00
1 Viburnum tinus, 12-15 in. ................ 1.00

SPECIAL PRICE
$2.75

Regular Value $3.00

A MINIMUM OF DAILY CARE WILL TEND TO PROMOTE AN EXCELLENT GARDEN
NANDINA . Heavenly Bamboo
Nandina domestica. 10 ft. In China this is considered one of their favorite plants, and justly so. It is extremely decorative all the year. In the spring and autumn the large compound leaves are tinged with red; in early summer the large panicles of white flowers, and in the winter, the crowning glory, terminal spikes of large bright red berries which are retained until the following spring. Hardy to Washington and Long Island. This is a FRUITLAND NURSERIES SPECIALTY.

NERIUM . Oleander
All Neriums are practically hardy in this latitude. They are also successfully grown along the coast of southern New Jersey, but should be protected during winter. They commence to bloom the last of April and bloom throughout the summer. The Oleander is a most desirable plant for growing in tubs in conservatories. Height 15 ft.
Mme. Peyre. Very double; triple corolla; pale flesh.
Prof. Pariariote. Pink; double corolla; very fine.
Single White. Strong grower; continuous bloomer.
Double Dark Red.
Double Yellow.
Double Peachblow.

OSMANTHUS . Olive
Osmanthus aquaticum. 25-30 ft. A most beautiful evergreen shrub, with dark green, spiny-toothed leaves, resembling the Holly. Fragrant white flowers produced in fall.
O. fortunei (Fortune Olive; Holly-leaf Tea Olive). 25 ft. A strikingly beautiful shrub with dark green, spiny-toothed leaves resembling the Holly. In fall the plant is covered with delicately fragrant white flowers. Without doubt this is one of the most desirable broad-leaved evergreens, but will give best results when planted in rich soil and in partial shade.

OSMANTHUS . Olive—Continued
O. fragrans (Olea fragrans; Sweet Olive; Tea Olive). 18 ft. Small, white flowers which emit a pleasing fragrance are produced in clusters. The blooming period begins in the fall and lasts for several months. It is of easy culture. As a conservatory shrub for Northern florists, it will be found invaluable.

This is to thank you for your very considerable letter of explanation concerning the later order, which I sent in too late. I should have known better, but when I happened to see some enormous Hadley roses, I felt I couldn't wait another season to have some like them. I have never heard of anyone who ordered plants from Fruitlands who was not more than satisfied. My neutral ground (around the corner from Huey Long's Capitol) has been decorated for weeks with trailing sprays of lovely Silver Moon and double Cherokee roses bought from you several years ago. They are admired by all who pass. I was glad to receive the catalog. Many thanks.—M. G., Baton Rouge, La., April 28, 1938.
PITTOSPORUM

Pittosporum tobira (Tobira Pittosporum). 10 ft. A fine, compact-growing shrub with dark green leaves clustered at the ends of the branches. Flowers yellowish white, very fragrant, produced the middle of April and last a long time. A splendid shrub for specimens or masses, and can be trimmed in fanciful shapes.

PYRACANTHA . Fire Thorn

Pyracantha will be severely pruned before shipping, to facilitate transplanting.

Pyracantha gibsii. 12 to 14 ft. A fine ornamental evergreen bush. Vigorous, hardy, and nearly spineless. In the autumn it bears large clusters of yellow berries, which contrast admirably with the glossy, dark green foliage. Probably tender north of southern Ohio.

P. gibsii. 12 to 14 ft. Same as above, except fruit is red.

ROSEMARINUS . Rosemary

Rosmarinus officinalis. 4 ft. A shrubby evergreen from Europe with blue flowers borne in the axils of the leaves. One of the old favorites among aromatic shrubs. Very effective in a border or for planting in clumps. Will be cut back to 6 inches to facilitate transplanting.

<table>

RUSCUS . Butcher's Broom

Ruscus aculeatus. 3 ft. A unique, dwarf evergreen shrub from England, with acute or spiny, bract-like leaves ½ to 1½ inches long. Produces numerous red berries which are retained during winter. Strong plants, $1 each.

THEA . Tea Plant

Thea sinensis. 20 ft. This is a native of India and China, where it is widely cultivated, as the leaves make the tea of commerce. Large shining leaves and fragrant single white blossoms are produced here in winter. Related to and sometimes considered a Camellia.

QUERCUS . Oak

Quercus acuta (Japanese Evergreen Oak). 20 to 50 ft. Without doubt, this is the most beautiful Evergreen Oak ever introduced. Tree of medium growth, thriving in almost any soil.

Quercus suber (Cork Oak). 20 to 50 ft. The Oak which produces the cork of commerce. Usually the first crop of cork can be taken when the tree is ten years of age. It thrives well here and is ornamental as well as useful. Keep trees well mulched until thoroughly established.

Above two Quercus:

PLANTING EVERGREENS

Nearly all plants taken from the open ground are lifted with a ball of earth around the roots. This is wrapped in moss, excelsior or burlap. Plants with burlap around the ball may be planted with the burlap left on. Before filling the hole, cut the string to loosen the burlap and release it from the ball. It need not be removed from under the plant. When moss or excelsior wrapping is about the earth ball, this wrapping must be carefully removed. In no case should the earth about the roots be disturbed. If the ball of earth falls away from the roots the plant must be defoliated and cut back. It is advisable to prune severely and defoliate such plants as Camphor, Elaeagnus, Ilex, Laurocerasus, Ligustrums, Neriums, Photinia, and Quercus.

Preparing the soil properly will give the best results. Dig holes of ample size. Place a layer of rich top soil mixed with compost in the bottom of the hole, set plant at proper depth, and fill hole half full with earth. At this point pour in water freely, but do not wash soil from roots. Allow water to settle, put in more soil and firm it about the roots; then fill up the hole. Place a mulch of well-rotted leaves to depth of from four to six inches about the plants for protection in winter and summer.

YUCCA

Yucca aloifolia (Spanish Bayonet or Dagger). 6 ft. The well-known native variety. Leaves very stiff, dagger-shaped. Flowers creamy white in June and July.

TESTIMONIALS

The trees that I ordered from you were planted today. I am writing to tell you what nice trees they are, and how pleased I am with them. When I have a chance to, I will highly recommend you all to any of my friends.—Yours truly, T. C. H., Lancaster, S. C., November 28, 1935.

Plants from your nursery have grown off nicely. This makes two seasons we have bought from you.—B. M., Sandy Springs, S. C., November 28, 1935.

Last April I bought two Juniperus from you and had them shipped way out to Utah. They arrived in fine shape, and made fine growth last summer. I just wanted you to know how I have enjoyed it.—Mrs. O. W. A., Salt Lake City, Utah, January 9, 1936.

The Magnolia tree I ordered from you for the U. D. C. Chapter to plant on the grounds of the Junior High School arrived this morning. It has already been planted. The soil and the ground was high in his praise of the tree and the excellent manner in which it was packed. The Chairman of the Board of Trustees was also present and expressed like sentiments—Mrs. M. T. M., Anderson, S. C., January 17, 1936.

The roses and spiraea received yesterday. All plants in good condition. The spiraea were excellent specimens.—Dr. C. M. S., Jacksonville, Fla., February 6, 1936.

We received our small order of recent date and notice that we are indebted to you for the postage, which we are enclosing herewith. We appreciate the prompt and courteous attention given our order and hope to give you a much larger one in the future.—Mrs. J. H. W., Birmingham, Ala., February 15, 1936.

I received the plants you sent, and am so pleased with their appearance. They came through in splendid shape, and I am sure will grow.—Miss E. B., Robertsdale, Ala., March 14, 1936.
Fruitland Nurseries Grow BEAUTIFUL CONIFERS

Here at Augusta we have some of the most beautiful coniferous evergreens to be found. Wonderful soil, ideal climate, and expert growers make FRUITLAND conifers the best for you.

- Every day in the year Evergreens have an important place in the landscape picture. In summer, the foliage enriches the color of shade trees and shrubs; in winter, when days are dull and gardens sleeping, the Evergreens show their forms and color-tones in a most appealing fashion, and when the new growth breaks in spring we know that King Winter has retreated and that the “Time of the singing of birds” is at hand.

To keep Coniferous Evergreens beautiful through the years, they should be fertilized annually. The best season is in March, just before the new growth begins. Well-rotted manure is the best fertilizer to use. If this is not to be had, sheep-manure and bonemeal are very satisfactory. Keep the soil loosened. If plants are in beds, these beds should be worked up at least six inches from the outside of the branches. If specimen plants, make a circle at least 12 inches outside branches of plant. Keep this free from weeds and grass.

Practically all conifers may be pruned, and thus kept shapely. The only species not usually pruned are Pinus and Cephalotaxus. Shearing may be done not later than May and June, as growth is slow on certain varieties, and plant would be too formal and stiff during the winter if pruned later.

Very little spraying is necessary for Coniferous Evergreens—usually two sprayings of 16 tablespoonfuls of Fungi-Bordo and two teaspoonfuls of Black-Leaf 40 to each gallon of water will control the fungus and insect disease of these plants—one spraying in May or June and another in July or August.

Our conifers are grown in the most careful and scientific manner. Nearly all of the open-ground plants have been grown one year in pots and then in the open ground and are afterwards several times transplanted, and therefore have excellent root-systems.

The figures after each name denote ultimate height of plant.

ARBORVITAE. See Thuja.

BIOTA. See Thuja.

CEDRUS . Deodar Cedar
Cedrus deodara. 50 ft. The Great Cedar of the Himalayan Mountains. A stately tree with glaucous green foliage and feathery spreading branches. Perfectly adapted to this climate. Each 30

NOTE—We can supply many of the conifers in larger sizes. Write for prices.

CHAMAECYPARIS . Retinospora
JAPAN CYPRESS
Chamaecyparis lawsoniana (Cupressus lawsoniana). Lawson Cypress from California and Oregon, where they are timber trees to 100 ft. In cultivation they usually are about 10 to 20 ft. Valuable, as they thrive in moist shady locations where so few conifers will grow. Should not be planted in dry hot locations. FRUITLAND NURSERIES has four distinct and beautiful varieties which we have selected as being the best for the South.

| C. obtusa nana (Dwarf Hinoki Cypress). 6 ft. Somewhat irregular in outline, this dwarf form of Chamaecyparis relieves the monotony of more formal conifers. The foliage is a rich dark green, holding its color during the entire year. In growth the tree is compact and is numbered among the best of the dwarf types. Japanese gardeners use this variety for training and pruning into novel and grotesque forms.

JUNIPERUS . Juniper

A most worthwhile and attractive genus of evergreens. In habit of growth they vary from prostrate creeping shrubs to tall pyramidal trees, varying in foliage coloring from bright green to glaucous blue and bronze gold. There is about forty species and innumerable varieties distributed from the arctic zone to the tropical mountains.

SPREADING OR TRAILING VARIETIES

Here belong the most widely planted varieties, being used in foundation planting and in rock gardens and terraces.

Juniperus chinensis pfitzeriana (Pfitzer's Juniper). 6 ft. This is the most widely planted of the spreading Junipers, and spreading branches pendant at ends. Foliage a constant grayish-green.

J. communis depressa. 4 ft. Low spreading compact variety, with bluish-green foliage.

J. communis depressa aurea. 4 ft. Similar to the above, but with young growth tinged a bronze golden. Not satisfactory for sandy soil.

Chamaecyparis obtusa nana

<table>
<thead>
<tr>
<th>Each</th>
<th>2 to 3 ft.</th>
<th>$3.00</th>
<th>3 to 4 ft.</th>
<th>$2.00</th>
</tr>
</thead>
</table>

J. sabina tamariscifolia (Spanish Savín). 2 ft. A dwarf trailing form of great merit. Ideal for rock gardens and terraces.

J. squamata (Scaly Juniper). 3 ft. A very prostrate trailing from Asia, having pleasing glaucous green foliage. Grows well in sandy soil. The true type like FRUITLAND has is difficult to procure.

All spreading Junipers:

<table>
<thead>
<tr>
<th>Each</th>
<th>3 to 4 ft.</th>
<th>$4.00</th>
<th>3 to 5 ft.</th>
<th>$6.00</th>

</table>

TALL OR COLUMNAR VARIETIES

This class is used for tall screens; accent in foundation plantings and specimen.

<table>
<thead>
<tr>
<th>Each</th>
<th>2 to 3 ft.</th>
<th>$2.00</th>
</tr>
</thead>
</table>

J. communis (Common or English Juniper) 20 ft. Native to North America and Europe. FRUITLAND has a narrow shaft-like variety not to be confused with the loose spreading typical form so often seen.

J. virginiana (Redcedar) 50 to 80 ft. Our native "Cedar Pencil" Juniper. One of the most desirable and accommodating pyramidial trees.

<table>
<thead>
<tr>
<th>Each</th>
<th>8 to 10 ft.</th>

UNATTRACTIVE ARCHITECTURE, WITH THE AID OF VINES, CAN BE MADE BEAUTIFUL
TALL OR COLUMNAR VARIETIES—Cont’d

J. communis ashfordi (Ashford Juniper). 10 ft. Resembles the Irish Juniper, but hardier, healthier and more desirable for the South.

J. communis hibernica (Irish Juniper). 10 ft. Resembles in its slender habit a small Italian Cypress. Each 10 5 to 6 ft. ... $3.00 4-5 ft. ... 3.00 3-4 ft. ... 2.00 $17.50 2-3 ft. ... 1.50 12.50 $15.00 18-24 in. 1.00 8.50

TALL OR CONICAL VARIETIES

In this group are the rather slow growing, long lived varieties, which may be used while small in urns and boxes. May be planted in sunny foundation groups and specimens.

J. chinensis abo-variegata (Whitewave Chinese Juniper). 10 ft. dark green color all the year. The bark is a bright red. Suitable for the base of a house or bay window. A graceful small tree. The foliage is a bright green and white.

J. chinensis globosa (Globe Juniper). 4 ft. A dwarf Juniper with dark green Cupressus-like foliage. If sheared will grow in a compact globe shape.

J. chinensis stricta. Same as the above, but a solid, soft gray-green.

Above three Junipers:

Each 10 3 to 4 ft. ... $4.00 2 to 3 ft. ... 3.00 18 to 24 in. ... 1.50

SUGAR LOAF OR BOX JUNIPER

Juniperus communis oblonga. 10 ft. An ideal plant for hedges and for sides of steps. Stands hard pruning and sandy soil. FRUITLAND’S plants are trimmed in square shapes resembling a sugar loaf or boxes. Each 10 24 to 30 in. ... $1.50 18 to 24 in. ... 1.00

J. chinensis foemina (Chinese Juniper). 10 to 15 ft. An attractive variety with spiny, bright green foliage, which does not change its color in winter. MOST DESIRABLE.

Each 10 6 to 8 ft. ... $5.00 4 to 5 ft. ... 2.50 2-3 ft. ... 1.50

LIBOCEDRUS. Incense Cedar

Libocedrus decurrens (California White Cedar). 75 ft. A native of the west coast of the United States. It forms a compact column of lustrous foliage which holds its dark grey-green color all the year. The bark is a bright cinnamon-red. For a specimen tree, or to give height to a large group, it is without a superior.

Each 10 8 to 10 ft. ... $7.00 6 to 8 ft. ... 5.00 4 to 6 ft. ... 4.00 2 to 4 ft. ... 2.00 $27.50 2 to 3 ft. ... 1.50

PINE. Pine

Pinus excelsa (Bhutan Pine). 15 ft. Resembles the White Pine, but with much longer and more glaucous leaves, and of a more graceful habit. It is known in India as “Drooping Fir.” Each 6 to 8 ft. ... $6.50

THUJA. Biot

ASIATIC VARIETIES

Thuja orientalis (Oriental Arborvitae). 10 to 30 ft. A beautiful conifer without the golden tint. Variable in form, but the plants we offer are very fine and will prove most satisfactory. We shear our plants several times a year and give them plenty of space to develop, insuring a compact plant.

PLANT EVERGREENS, BEAUTIFUL THE YEAR AROUND
THUJA—Continued

T. orientalis aurea pyramidalis (Golden Pyramidal Arborvitae). 25 ft. Foliage a beautiful golden tint. Its columnar habit adapts it to formal planting and suits it to lawn planting and evergreen groups. Erect, symmetrical, and compact growth.

T. orientalis pyramidalis (Pyramidal Oriental Arborvitae). 10 to 15 ft. The foliage retains its bright green color throughout the year, thus avoiding the unpleasant brownish effect of some other varieties during the winter season. This fact, coupled with its compact, upright habit of growth, makes it extremely popular for general landscape plantings.

IF IN AUGUSTA VISIT FRUITLAND NURSERIES
PLANTS FOR HEDGES

from FRUITLAND NURSERIES

Owing to the volume production, FRUITLAND NURSERIES can give you the best and a greater variety of hedge material.

In the South we can have many beautiful hedges, as there are so many lovely plants so satisfactory for this purpose. Hedges are more pleasing than fences; they are less expensive and will not wear out.

DECIDUOUS FLOWERING PLANTS

Cydonia japonica (Flowering Quince). 100
2 to 3 ft. .......................... $25.00
Spiraea thunbergi (Thunberg Spirea).
12 to 18 in. ................................ 17.50

CONIFEROUS EVERGREENS

Juniperus sabina (Savin Juniper).
24 to 30 in. .................................. $35.00
NOTE: Not less than 40 plants will be furnished at the 100 price; not less than 400 at the 1,000 price.
ORNAMENTAL GRASSES

- Unusual effects and delightful contrasts can be obtained by combining Ornamental Grasses with hardy plants in the garden borders. Grasses are also effective as ornamental screens and for bordering garden pools, or for mass-planting along the walk or driveway and in groups on the lawn. As the Grasses are perfectly hardy, they live from year to year and are continually increasing in beauty and in size of clumps.

ARUNDO . Giant Reed
Arundo donax (Giant Reed). A fine hardy variety with long, green leaves.
A. donax variegata (Striped Giant Reed). A hardy, vigorous variety with long leaves, striped green and white. Very striking.
Strong roots, 25 cents each; $2.00 for 10.

BAMBUZA . See Phyllostachys.

CORTADERIA (Gynerium) . Pampas Grass
Cortaderia argentea (Common Pampas Grass). Silvery, plume-like spikes of flowers. An old favorite for grouping on the lawn.
C. Roi de Roses (Pink Pampas Grass). Plumes very compact, of a delicate rose-color. A beautiful and scarce variety.

All Cortaderias: Each $2.00 $17.50
Extra heavy clumps
Heavy
Extra strong clumps
Strong clumps

EXOTIC BAMBOOS

Few plants, not even the palms, give such a graceful tropical appearance to the general landscape as do the various Bamboos. They thrive in any location, wet or dry, but for the first and second year they must be given water during the dry periods if planted in dry places. Bamboos are desirable for screening unsightly objects, and by the third season after planting they will be effective for this purpose. The dried cane may be used for light fences, fishing-roses, and similar purposes.

Arundinaria fastuosa. 40 ft. A Japanese bamboo related to our Southern Cane Reed so often used for fishing poles. In very limited quantities.
Bambusa multiplex distichia (Fern-Bamboo). 12 to 15 ft. A graceful, dwarf bamboo which spreads very slowly, making it ideal for small places and for hedges and screens.
P. bambusoides (Japanese Timber Bamboo). 30 to 50 ft. The tallest of all the Bamboos. Spreads slowly.
P. edulis (Edible Bamboo). An oriental bamboo growing 10 to 100 ft. One of the hardiest varieties. Much grown in China and Japan for its edible shoots which are used like asparagus.
P. green (Green Bambo). 30 ft. A hardy variety of rapid growth, spreading by rootstocks. Should be given plenty of space to develop.
P. henryi. 26 ft. This is a hardy Chinese Bamboo of spreading habit and vigorous growth, introduced by the U. S. Dept. of Agriculture. Young shoots are edible; canes not larger than 1½ in. in diameter.
P. nevini. From China. 15 ft. A hardy, rather dwarf bamboo of running types. Has withstood zero temperature with little injury to leaves. Canes useful for staking plants, fishing poles and other purposes on the farm.
P. nigra (Black Joint Bamboo). 25 ft. Stems become black with age. Most unusual and scarce.
Sasa tesselata. 5 to 6 ft. A Japanese Bamboo with striking broad leaves. Eventually the plant makes a most attractive clump.

All Bamboos: Each $10
Extra strong divisions
Strong divisions
Clumps for immediate effect (B&B)

PLANTING HEDGES

Prepare the ground by plowing or spading to the proper width and depth. Open the trench 18 inches wide by 18 deep. Apply to this a liberal amount of well-rotted stable manure, and if this is not available, bone meal or some high-grade fertilizer. Mix the manure or fertilizer thoroughly with soil. Set the plants in a straight line in the trench one foot apart, about one inch deeper than they originally stood in the nursery row. Firm the earth well about the roots, level off, and then cut the plants back to within four inches of the ground. In the spring, after the plants have made a growth of six or eight inches, cut off one-half this growth, both sides and top, and proceed in a like manner with each succeeding growth until your hedge has reached the desired height and width. Cultivate well.

Prune hedges often; especially in early summer when the growth is prolific. The secret of a beautiful hedge is regularity in form and outline and density of foliage. By pruning carefully and to a line one can secure the desired regularity. By pruning often, the growth is continually forced along the sides of the branches left untrimmed; voids will fill up and a smooth dense mass of foliage will result. Hedges must be trimmed on sides as well as on the top. Otherwise the hedge will get broader at the top than below. The lower branches will be shaded and the hedge will be unattractive. The ideal hedge is slightly A-shaped, being broader at the base. This permits the sunlight to reach all sides of the hedge.

SASA FROM THE SOUTH'S OLDEST NURSERY
Fruitland's Field Grown

Roses planted in the fall will grow and bloom better than spring planted ones. Order roses early, while selections are complete. There is always a shortage of some varieties.

ROCK GARDEN ROSE

FRUITLAND'S NEW AS TOMORROW ROSES
Amelia Earhart. HT. Patent No. 63. Yellow; very full, graduating from a deep yellow center to an outer collarette of large cream petals with a blush overtone; very fragrant. B. $1.50 each.

Ami Quinard. HT. Long-pointed, medium-size bud; flower medium size, semi-dou-ble, fragrant, deep velvety crimson, good stem. Dark green, leathery, disease-re-sistant foliage. Vigorous, upright, bushy grower.

Briareifl. HT. Sport of Columbia. Very large, long-pointed flower, 4½ in. across, high center, lasting, moderately fragrant, deep rose-pink at center, passing to lighter on outer petals. Borne singly on long strong stem. B.

Cl. Cecile Brunner. Cl. Poly. Small fragrant flowers of rosy pink and yellow, borne in sprays on recurrent blooming sturdy plants.

Countess Vandal. HT. Bronze, copper-salmon and gold. Patent No. 38. B. $1.00 each.

Edward Mawley. HT. Buds almost black, unfolding to dark red, fairly full flowers of exquisite form in half-open stage; highly perfumed; quite lasting; plant moderately vigorous.

Golden Dawn. HT. Pale yellow. Large, globular buds, with old rose markings, open to high-centered blooms; very fragrant. Plants medium height, bushy, spreading habit; immune to disease.

Mme. Leon Pain. HT. Splendid salmon buds and pink blooms of great size, tinted heavily with silvery flesh and orange at the center; fragrant. Plant vigorous; free-flowering and almost immune to disease.

New Dawn (U. S. Plant Patent No. 1). A magnificent new climbing Rose with blush-pink flowers which are slightly fragrant, full double, and of medium size. The plant blooms continuously from June to late fall. B. $1.50 each.

Portadown Fragrance. HT. Peach - pink, heavily flushed with orange at base of petals—an exquisite shade. It has delicious perfume—different from any other rose. Plant low and sprawly, rarely over 12 inches high.
FRUITLAND'S NEW AS TOMORROW ROSES—Continued

Roselandia. HT. Rich, golden yellow, fragrant and free flowering. Excellent foliage and habit.

Scorch. Cl. HT. Large, semi-dbl., brilliant scarlet-crimson flower; fragrant.

Sunkist. HT. Brownish orange sport of Joanna Hill. $1.00 each.

THE TALISMAN TRIO
Mary Hart (Patent No. 8). Red sport of Talisman. Maroon-red buds, opening to well-formed blossoms of deep, blood-red with overglow of amber. Heavy stems; excellent for cutting. B. $1.00 each.

Talisman. HT. Golden yellow, stained with copper-red and orange; rose on the inside of petals. B.

THE ROSE TRIO FOR THE SOUTH
Mrs. Chas. Bell. Shell pink.
Radiance. Pink.
Red Radiance. Red.

FRUITLAND GROWN ROSES
The Best Roses for Southern Gardens

“We bring roses, beautiful fresh roses,
Dewy as the morning and colored like the dawn.”

We can furnish budded and own root roses. The letter B after the descriptions denotes budded varieties and O. R. denotes own root.

ORDER ROSES EARLY

- Perfect flowers cannot be had when plants are set out late in February or March, and permitted to produce blooms before they are well established. If these plants are allowed to grow until the following fall and receive proper treatment, pruning, fertilization and cultivation, there will be no cause for complaint. Order early and plant early for best results.

ROSE BUSHES — Specially Tested

PINK BUSH ROSES

Bessie Brown. HT. Massive, very double blooms of light flesh color; some fragrance; moderate growth and bloom. Not a strong plant, its energies going into its enormous flowers noted for remarkable beauty. B.

Briarcliff. HT. Sport of Columbia. Very large, long-pointed flowers, 4½ inches across; high center, lusty, moderately fragrant, deep rose-pink at center, passing to lighter on outer petals. Borne singly on long, strong stem. B. and O. R.

Columbia. HT. Pink, deepening to glowing shade of pink as the bud opens. A peculiarity is that the shades become more intense until full maturity of flower. Blooms often measure 6 inches across. B.

Duchesse de Brabant. T. Soft, light rose, with heavy shadings. Healthy, vigorous and free flowering. O. R.

Jonkheer J. L. Mock. HT. Clear imperial pink, highly perfumed, with very large blooms. B.

Killarney. HT. A favorite brilliant silvery pink Rose, beautiful in bud and open blooms. Fine bloomer and strong grower. B.

Lady Ashtown. HT. Satiny buds and blooms of deep shining pink; high center; double; quite fragrant. Free bloomer. B.

Maman Cochet. T. Deep rose-pink; inner side of petals silvery rose; very double. Extra strong grower; fine bloomer. We can confidently recommend it. B.

Mme. Butterfly. HT. A Rose that is in great demand. Sport of Ophelia, but with more blooms and more petals to the bloom. Color bright pink, with lovely deeper center. B.

Mme. Caroline Testout. HT. A magnificent Hybrid Tea of the very loveliest shade of pink. B.

Mary, Countess of Lichester. HP. Large double blooms of deep rose-pink, full cupped form, and quite fragrant. Plant bushy and free bloomer. Hardy. B.

Mrs. Charles Bell. HT. A shell-pink sport of the well-known Radiance. Very desirable. B.

Ophelia. HT. Brilliant salmon-pink, shaded with rose on outer edge of petals; very fragrant. B.

Paul Neyron. HP. The flowers are immense, probably the largest of all Roses. Bright, shining pink; clear and beautiful, double and full; finely scented. O. R. and B.
PINK BUSH ROSES—Continued

Radiance. HT. Brilliant rosy carmine, shaded with rich pink tints; large and full. Strong, upright stems. B.

Rapture. HT. Sport of Mme. Butterfly, but of deeper pink color, and stronger grower. B.

Willumere. HT. Superb buds and blooms of richest pink, with yellow glow in center. Strong grower; persistent bloomer, but not fragrant. B.

RED BUSH ROSES

Charles K. Douglas. HT. Flowers large, semi-double, brilliant light crimson with scarlet undertone. B.

Crusader. HT. Blooms big, double, and a rich velvety crimson. A fine, healthy variety and vigorous grower. B.

Cuba. HT. Very large, semi-double flower, cardinal-red with a slight yellow tinge. While it is very beautiful, it fades quickly. It may be classed as a single flower, yet it is striking and beautiful. Plant vigorous, with few thorns. B.

Dainty Bess. HT. A striking and distinct single, broad-petaled flower. The rose-colored blooms are borne in clusters and are distinguished by the large, flat group of stamens. B.

E. G. Hill. HT. Great massive blooms of deep maroon, velvety on inside. B.

Etoile de Hollande. HT. Flower bright red, of medium size, finely full, deliciously perfumed. Upright, vigorous plant. B.

Francis Scott Key. HT. Double; slightly fragrant; rich, crimson. B.

Gênebra. HT. Scrambled. B. Scarlet—cinnamon bud opens into a clear red bloom. Flowers of medium size borne in clusters on long stems. B.

Hadley. HT. Deep, rich, velvety crimson. Well formed buds on stiff stems. Very fragrant. B.

J. B. Clark. HP. The color, a deep scarlet shaded blackish crimson, is unique among Roses. Flowers large and beautifully formed. B.

John Russell. HT. Large, ovoid buds and immense crimson flowers of the old-time globular type with the famous exhibition center. Plant exceptionally strong and vigorous. B.

Louis Philippe. C. Dark crimson; fine for massing. Excellent bloomer. Old-time rose. O. R.

Magna Charta. HP. Bright, rosy carmine. A standard variety. O. R.

Miss Rowena Thorn. HT. Bud very large, long-pointed; flower enormous, opens perfectly, color a blending of fiery rose and rosy mauve, together with old-gold, center rose washed with gold, borne on long, strong stem. B.

Patience. HT. Long-pointed, medium-sized bud; flower large, double, high-centered, very lasting, moderately fragrant, scarlet—carmine, passing to deep orange at base, shading to orange—scarlet. B.

Red Columbia. H.T. Semi-double crimson; free bloomer; sport from Columbia. B.

Red Radiance. HT. A splendid, even shade of clear red. Vigorous grower and a remarkable bloomer. B.

Sensation. HT. Long-pointed buds; large, full blossoms of darkest velvety red with tinges of almost black. Most beautiful. B.

Tempia. HT. The flower is brilliant red, of medium size but full double, and borne on fairly long stems. Plant is vigorous and upright in growth, with large, leathery foliage and few thorns. B.

THE POPULAR TWO-TONED ROSES

Autumn. HT. Bud medium size, burnt—orange; flower medium size, double, cupped, lasting, moderately fragrant. Good upright grower; free and continuous bloomer. Foliage abundant, glossy, disease—resistant. B.

Betty Uprichard. HT. A pretty combination of colors—inside delicate salmon—pink to carmine, outside glowing carmine with coppery sheen and orange suffusion. Well formed, medium—sized flowers of good substance and sweet scented. B.

Charles P. Kilham. HT. Large, beautifully shaped blooms of brilliant red—orange, suffused with glowing scarlet; slightly fragrant. Foliage resistant to mildew; vigorous, bushy, upright. B.

Lady Margaret Stewart. HT. A large exhibition bloom with enormous petals. It is of perfect form, with high—pointed center, golden yellow, shaded and streaked with orange and red. Especially handsome foliage, free from disease. B.

Padre. HT. Coppery scarlet, with bright yellow at base of petals. Semi-double blooms, with 15 to 20 petals, often curiously notched. Strong, erect grower; exceptionally free flowering. B.

President Hoover. HT. Maroon, orange, and gold. B.

Rev. F. Page Roberts. HT. A fine Rose of vigorous habit, with well—shaped blooms carried erect on long, stiff stems. Orange—yellow, becoming lighter at the edges of the petals; fragrant. B.

Talisman. HT. Golden yellow, stained with copper—red and orange; rose on the inside of petals. B.

WHITE BUSH ROSES

Caledonia. HT. Large; white; full; double; high—centered. B.

Frau Karl Druschki (White American Beauty). HP. This is deservedly one of the most popular free blooming Roses. Flowers pure white, perfect in form. Plants strong growers, perfectly hardy everywhere. A truly magnificent Rose. B & O. R.

Kaiserin Auguste Viktoria. HT. Best white Hybrid Tea grown. Creamy white; very double; buds large and pointed. B.

White Maman Cochet. T. Pure white, sometimes tinged blush. A superb Rose. B.

YELLOW BUSH ROSES

Amelia Earhart. HT. Patent No. 63. Yellow; very full, graduating from a deep yellow center to an outer collarate of large cream petals with a blush overtone; very fragrant. B. $1.50 each.

Duchess of Wellington. HT. Long, saffron—yellow buds opening to very large, light yellow flowers. B.

Lady Hillingdon. T. Apricot—yellow; beautiful bud. Strong and vigorous grower; free bloomer. Excellent. B.

Luxembourg. HT. Makes large, beautifully pointed bud, and open flower, is full and compact. A deep golden yellow. B.

Souv. de H. A. Verschuren. HT. Buds very long—pointed; opens well; flowers large, full, perfectly formed; fragrant, carmine—yellow, passing to orange—yellow; borne singly on long stems. Vigorous grower; immune and foliage disease—resistant. B.

Sunburst. HT. This beauty of a Rose has been thoroughly tested, and it easily stands at the head of all sorts of its kind. B.

ADD VARIETY TO YOUR GARDEN WITH ORNAMENTAL GRASSES
DWARF POLYANTHA ROSES

Can supply these roses budded and own root, unless otherwise specified.

Catherine Zeimet (Double White Baby Rambler). This is a very profuse and perpetual bloomer; the buds are pure white, about 1 to 1½ in. in diameter; plant grows to a height of about 20 in.; compact habit; excellent for a dwarf hedge.

Edelouissant. Medium-sized, ovoid bud; flower medium size, very double, globular, extremely lasting, slightly fragrant, dazzling red, borne in good cluster on medium-length stem. Abundant foliage.

Ellen Poulsen. Bud and flower large, full, double, very lasting; moderately fragrant, bright, cherry-pink, borne in clusters on medium-length stem. Abundant foliage.

Else Poulsen. Medium-sized bud; open flower semi-double; lasting; slightly fragrant; bright rose-pink, borne in cluster on good stem. Foliage glossy, dark green, disease-resistant.

George Elger. A superb "Baby Rose," different; it produces great quantities of lovely little golden yellow buds, opening into miniature, symmetrical roses. The plant is so loaded with blooms that it resembles a large bouquet.

Gladiolus. Medium-sized, ovoid bud; flower medium size, extremely lasting, perfect, orange-scarlet flowers of lasting qualities borne in clusters. It is vigorous, up-right grower, and has won many medals in flower shows.

Goldsalmon. Bears large trusses of miniature blossoms of a salmon-orange shade that do not fade. Unique.

Gruß an Aachen. Bud salmon; flower very large for its class, extremely lasting, slightly fragrant, orange salmon at center, passing to white at edges, borne several together on short, strong stem. Very dwarf.

Ideal. Single flower of South Cavell. Large double orange-scarlet flowers of small, double, slightly fragrant blossoms. Very lasting.

La Femme. Dwarf, pale pink. O. R.

Orange King. Buds small; flower small, double, deep orange-yellow, in large clusters. Bushy, free bloomer. O. R. and B.

O. R. Deep cerise, with a distinct white center. Showiest and daintiest of the Dwarf Polyanthas. Flowers excellent for cutting purposes. O. R.

Salmon-Spray. Rich salmon-pink flowers, reverse of petals carmine, borne in sprays of 5 to 20 or more. Constant bloomer.

Tip-Top. (Baby Doll). Unique. It grows about 18 in. high and is literally covered with miniature blooms from early spring until freezing weather. Tips of petals show a vivid crimson, mellowing down into shades of pink, saffron, lavender, gold, and finally at the base of the petals it is deep old-gold.

Triomph Orienais. Large, semi-double, open, lasting, cherry-red, borne in large clusters on strong stems. Vigorous, bushy grower.

CLIMBING ROSES

We can furnish budded and own root roses. The letter B. after the descriptions denotes budded varieties, and O. R. denotes own root.

PINK CLIMBING ROSES

American Pillar. HW. Large, single flowers of rich rosy pink, approaching bright carmine, with golden yellow stamens. Blooms profusely, almost covering the foliage. A vigorous grower and valuable climber. O. R.

Anemone (Pink Cherokee). (Laev.) Large, beautiful, single pin flower; B.

Cherokee, Pink. See Anemone.

Cl. Mme. Caroline Testout. Cl. HT. Blooms similar to the above variety; color satiny rose, growing darker to cherry. Plant is a rampant climber. B. and O. R.

Cl. Maman Cochett. Cl. T. An exact counterpart of the popular Pink Bedder. Cl. T. It has in addition, in full bloom, the characteristic of its beauty. O. R.

Dr. W. Van Fleet. HW. Large, delicate pink-shleen, deepening to rosy flesh in center. O. R.

Lady Gay. HW. Light pink; similar to Dorothy Perkins, but later. O. R.

Madam Gregoire Staechelin. C.H.P. (The Spanish Beauty). Bushy, double, bright red. Clusters of delicate pink with deeper shade on outside petals. Disease-resistant; vigorous grower; abundant bloomer. B. and Mary Wallace. HW. One of the best and loveliest Wich-ura’s we have set in woodland. A bright, clear rose-pink, with salmon base to the petals; semi-double and well formed. O. R.

RED CLIMBING ROSES

Climbing American Beauty. HW. Well-formed, fragrant, crimson flowers; 3 to 4 inches in diameter, in April and May. Strong grower. Holds foliage late. O. R.

Cl. Meteor. Cl. HT. Dark velvety crimson, shaded maroon. A grand Rose. O. R.

Cl. Red Radiance. Cl. HT. Vigorous, climbing sport of Red Radiance described in bush roses. B.

Cl. Talisman. Cl. HT. Sport of Talisman described in bush roses. A.

Hiawatha. HW. Brilliant ruby-carmine; clear white eye. Very distinct. Vigorous grower. Almost evergreen. O. R.

Paul’s Scarlet Clumber. HW. Vivid scarlet, shaded crimson. Makes a brilliant display for a long time in the garden. B. and O. R.

Ramona. H. Laev. (Red Cherokee). A companion to White Cherokee, but with flowers of richer color and a better form. O. R.

Reine Marie Henriette. Cl. T. The best bright cherry-red Climbing Rose. Of good form and vigorous habit. B. and O. R.

WHITE CLIMBING ROSES

Banksian, White. B. Small, double, white flowers in clusters. O. R.

Cherokee, White. Laev. A fragrant, pure white Climbing Rose that is deservedly one of our most popular roses. The flowers are about 3 inches across and borne singly in late spring. It is a vigorous and rampant grower, with shining, glossy foliage, and makes a desirable covering for walls and archways. O. R.

Cl. Devoniensis. Cl. T. An old favorite. Creamy white, fleshy center; very fragrant. A good bloomer. B.

Cl. White Maman Cochet. Cl. T. A climbing form that when supplied with a power of climbing as its parent has a bushy Rose. White flowers tinged pink O. R. and B.

Double Cherokee. See Fortune Rose.

Fortune Rose. (Double Cherokee). (Laev.) A double form of the popular Cherokee Rose. The flowers are 2½ to 3 inches in diameter, similar to the White Banksian. An evergreen climber, white blooms in late spring. O. R.

Lamarque (Nois.) Large clusters of double, sweet, white blooms; B.

Mrs. Robert Peary. (Cl. A. K. Victoria). Creamy-white; very double. Large pointed buds. B.

Silver Moon. HW. Large, pure silvery white blooms. Vigorous growth. B. and O. R.

YELLOW CLIMBING ROSES

Banksian, Yellow. B. Small, double, sulphur-yellow flowers in clusters. A vigorous grower. O. R.

You Can Succeed With Roses If You Follow Our Instructions

Planting. Before planting, cut out all weak growth, leaving the stoutest and most vigorous shoots. These must be cut back to within 3 to 6 inches of the ground, depending on the vigor of the plant. Dig a big hole and set the plant about an inch deeper than it stood in the nursery row, provided it is on its own roots. Budded Roses should have the budded portion set 2 to 6 inches below the level. Fill the hole half full of soil, pour in water, let it settle, put in some more soil, firm till well about the roots, then fill in the hole and firm when the job is completed. Water the plants whenever needed, and keep the soil well cultivated.

Never use a spade in a Rose-bed, but use a digging-fork; this is less likely to cause injury to the roots. After the beds have been cultivated, rake the surface smooth and even. Frequent stirring of the surface is beneficial. A top-dressing of hardwood ashes is excellent.

Spraying. If aphids, black-spot, and powdery mildew are the chief Rose enemies. Aphis, or green plant-lice, attack the new growth of either the shoot or flower. To prevent the new growth, but usually in the flower, causing them to fall to open, turn brown and wither. Aphis may be removed by a strong stream from the hose. Both pests can be controlled by spraying with Garden Volk, using 1 part to 32 parts of water.

OUR FLOWERING SHRUBS REACH EVERY COLOR IN THE SPECTRUM
**VINeS**

**FOR SHADE, FLOWER AND SCREEN**

- We are fortunate at FRUITLANDS to have such a variety of vines, as there are so many ways that they may be used. The Ampelopsis, Decumaria, Ficus and Ivy will cling to trees or stumps, and masonry, without trellis. The Ivy, Vinca and Mitchellia are ideal ground covers for shady places. The remainder are handsome tall flowering vines. The Chinese Bignonia and Wistarias may be trained in standard forms, making lovely specimens.

**AMPELOPSIS . Ivy**

Ampelopsis tricuspidata (Japanese or Boston Ivy). A deciduous vine of rapid growth, suitable for covering walls, stumps, etc. Strong plants, 25 cents each; $2 for 10.

**ANTIGONON . Mexican Rose**

Antigonon leptopus (Rosa de Montana). Commonly called Mexican Rose. The flowers, which are carried in long sprays, are bright rosy pink. It is a desirable Southern vine, blooming freely from June until fall. The foliage is heart-shaped, dense, and makes a good covering for porch or trellis. The top dies down in winter, and therefore the roots should be protected with a mulching of leaves. Growth does not begin until April, therefore shipment cannot be made until early April.

**DECUMARIA**

Decumaria barbara. A native vine, almost evergreen here. Rather fragrant, white flowers in corymbs, somewhat like a hydrangea. Each Strong plants from pots | $ .50 |

**BIGNONIA . Trumpet Vine**

Bignonia capreolata (Cross Vine). A handsome, vigorous-growing evergreen, native climber, producing, in early April, a great profusion of trumpet-shaped flowers about 2 inches long, yellow-red on outside with yellow throats. Hardy in North. Strong plants from 3-in. pots, 25 cents each; $2 for 10.

- B. grandiflora (Chinese Trumpet Creeper). A desirable deciduous variety of medium growth. Can be kept trimmed as a bush, in which form it is most effective. Flowers very large, deep orange. Commences to bloom in May and continues nearly the entire summer. 50 cents each.

- B. Mme. Galen. In all respects similar to B. grandiflora, except flowers are a deeper shade of orange. 50 cents each.

**CLEMATIS**

Clematis jackmanii (Jackman Clematis). Large, intense violet-purple blooms. Free and abundant bloomer. The most popular large-flowering Clematis. Extra-strong 2-yr. plants, $1.00 each.

- C. Mme. E. du Val Andre. Large, violet-red. Strong grower and free bloomer. Extra-strong 2-yr. plants, $1.00 each.

- C. paniculata (Sweet Autumn Clematis). Very fragrant, white, star-shaped flowers produced in profusion during mid-summer and fall on long shoots. Handsome foliage. Extra-strong. 2-yr. field-grown plants, 25 cents each; $2 per 10. Note: Clematis does best in deep, rich soil. As soon as the plants are set out, supports on which to climb should be provided.

**FICUS . Climbing Fig**

Ficus pumila (F. repens). An evergreen climber with small, bright green leaves, and an excellent plant for covering walls, rocks, and rustic work. Makes a dense, dark green covering. In protected situations the vine is hardy in Augusta. Delivery after April 1. Strong plants, 25 cents each; $2.00 per 10; $15.00 per 100.

**GELSEMIUM . Jessamine**

Gelsemium sempervirens (Carolina Jessamine). Our native variety. Many bright yellow, fragrant flowers, in early spring.

- G. sempervirens flore-pleno (Double Yellow Jessamine). A rare sub-varietal of our native Yellow Jessamine; double flowers in great profusion in early spring and more sparingly in the fall. Blooms in the conservatory, nearly all winter.

ALL PRODUCTS OF FRUITLAND NURSERIES ARE FREE OF DISEASE
IPOMOEA
Ipomoea Leci (Blue Dawn Flower). A perennial morning glory from tropical America. Planted in early spring it will grow to 25 to 30 ft.; producing from July until frost hundreds of heavenly blue flowers, often 3 inches across. After the tops are killed, give the roots the same protection as you would the Coral Vine, and the plants will come out again the following spring. As this Morning Glory never sets seed it will never become a pest. Delivery after April 1st.

LONICERA . Honeysuckle
Lonicera browni (Brown's Honeysuckle). A strong, rapid-growing evergreen variety with orange-scarlet flowers in April. This is a decided improvement on L. sempervirens (Woodbine) both as to foliage and bloom.
L. heckrotti (Everblooming Honeysuckle). Flowers rose-colored on the outside, yellow in the center. A most excellent evergreen variety. Blooms continuously from early spring till winter.
L. japonica halliana (Hall's Japanese Honeysuckle). A very vigorous evergreen climber. White flowers changing to yellow are borne in great profusion in late spring or early summer, and again sparingly in the autumn. Good for trellis and ground-covers.

VINCA
Periwinkle
Vinca major (Bigleaf Periwinkle). An old and favorite plant, with large blue flowers in early spring. Leaves larger and a more vigorous grower than V. minor. Excellent for vases, rockwork, and bordering slopes.
V. major variegata (Variegated Periwinkle). Same as above, except leaves are green and white variegated.
V. minor (Common Periwinkle), a well-known trailing plant with blue flowers. Leaves dark green, but smaller than V. major. Strong clumps from open ground.

WISTARIA
All of our Wistarias are grown from free-flowering plants, and these must not be confused with the Wistarias which are grown from seed.
Wistaria floribunda rosea. Rose-colored or pale pink flowers. 2-yr. only.
W. sinensis (Chinese Wistaria). The well-known, single purple variety. Free bloomer.
W. sinensis alba (White Chinese Wistaria). A beautiful graceful, white-flowering climber.
W. sinensis flore-pleno (Double-flowering Wistaria). A shy bloomer until the vine is three years old, but afterward it blooms freely.

Colocasia esculenta (Elephant Ear). The well-known Elephant Ear. Bulbs, 10c each; 75c for 10.

DAISY

Bellis (Double English Daisy). Double Pink and Double White. 50c per doz.; $1.25 per 100.

DELPHINIUM

Belladonna. Spikes of clear turquoise-blue blossoms. 20c each; $1.50 for 10.

DIANTHUS . Pinks

Newport. Pink blossoms, excellent for cutting. Plumarius. The old-time grass pink. We offer a mixture of single and double forms in shades of pinks and reds. Both Dianthus: 20c each; $1.50 per 10; $10 per 100.

GERBERA

TRANSVAAL OR AFRICAN DAISY

Gerbera jamesonii. A South African early spring blooming perennial, having orange flame daisy-like flowers to four inches across. 25c each; $2.00 per 10; $17.50 per 100.

HEMEROCALLIS . Day Lily

Hemerocallis fulva. Golden Day Lily. Golden yellow, trumpet-shaped flowers on two-foot stems, starting to blossom in late May. 

H. fulva, Tawny Daylily. Orange trumpet-shaped flowers on three or four-foot stems, starting to blossom in June.

H. fulva flore-pleno. Double Tawny Daylily. Flowers are double and begin blossoming in July.

Prices on all Hemerocallis: 20c each; $1.50 for 10.

HOLLYHOCKS

We offer the improved double varieties in colors of Crimson, Maroon, Pink and White. 20c each; $1.50 per 10.

IBERIS . Hardy Candytuft

Iberis sempervirens. Hardy candytuft. Evergreen foliage and spikes of white blossoms in early spring. Ideal for edging beds and borders. Strong clumps. 25c each; $2.00 per 10.

IRIS GERMANICA

German Iris or Flag

We offer the following varieties, covering a wide range of color. More of these "Poor Man’s Orchids" should be planted:

Ambassadeur. Standards, velvety-purple; falls, purple-maroon.

Caprice. Rosy-pink.

Celeste. Azure-blue.

Early White.

Kochi. Claret purple.

Lobehnigri. Chiffon-rose.

Loreley. Standards, light yellow; falls, ultramarine.

Mme. Chereau. White, edge of petals frilled blue.

Mother of Pearl. Light lavender-blue.

Palida Speciosa. The old-time purple "Flag."

Princess Victoria Louise. S, sulphur yellow; F, plum, bordered cream.

Queen Flavia. Yellow.

Sherwin Wright. Golden yellow.

Prices of above varieties: 15c each; $1.00 per 10; $8.00 per 100.

Our selection, assorted colors: Each, 10c; 10, 75c; 100, 4.90.

LANTANA

One of the most satisfactory summer blooming perennials, as they stand heat and drought so well. Tops of plants die down here in winter, but with a little protection will come out again next season. We offer the following very complete list of all the old and new hybrid varieties.

A. Cook. Dwarf, claret and yellow.

Alba Perfecta. Dwarf, white; yellow eye.

Aurora. Medium. Yellow and orange.

Delicissima. Trailing, lavender.

Dwarf Orange. Orange and yellow.

Harkette Perfection. Tall; pink and cream.

Helvia. Dwarf; yellow and red.

Iolande. Semi-trailing; yellow and orange.

Jacob Shultz. Dwarf; deep yellow and red.

JANU d’Or. Medium; pink and cream.

La Pluie d’Or. Medium, yellow.

Leo Dex. Medium, ox-blood red and orange.

Lyre. Medium, white with yellow eye.

Melanipolia. Dwarf, cream and pink.

Mervall. Dwarf; lemon-yellow.

Proteus. Medium, pink and yellow.

Radiation. Tall, yellow.

Tall Orange. Plants from pots. Ready April 1st. 10c each; 75c per 10; $5.00 per 100.

LAVANDULA . Lavender

Lavandula. The true Sweet Lavender, growing about 18 in. high and having fragrant blue flowers in July and August. 25c each; $2.00 per 10.

LIRIOPE. Lily-Turf

Liriope muscari. An Asian evergreen, stemless herb. Blue flowers on spikes in July followed by black shining berries. Ideal ground cover for shade or sun.
LIRIOPE . Lili-Turf—Cont’d.

L. spicata. One of the best evergreens for carpeting the ground under trees and in shady places where grass will not grow. Narrow grass-like leaves to 12 in. long with white to violet flowers in July and August. Spreads very rapidly, making a dense ground cover very quickly. Each, 25; 10, $2.00; 100, $15.00.

OPHIOPOGON . Snakebeard

Ophiopogon jaburan vittata (Snakebeard). Similar to the above, but with handsome green and yellow foliage. 35c each; $3.00 per 10.

PAEONIA . Peony

Peonies do best in rich, rather moist, loamy soil, and if plants are protected from the hot afternoon sun they will give excellent results. They should have a liberal supply of water at all times, especially when in bloom during April and May. Fertilize well with cow-manure. Keep the ground well cultivated. If these few simple directions are carried out, the result will be most satisfactory. Plant during fall.

Louis Van Houtte. Red.

50c each; $4.50 per 10.

PANSIES

Transplanted plants, $2 per 100; not transplanted. $1.00 per 100.

PHLOX

Phlox paniculata. Rehniander. Salmon pink.

Phlox paniculata. R. P. Struthers. Bright, racy red.

Phlox paniculata. Rijnstroom. Pink.

Phlox subulata rosea. 6 in. A low growing evergreen with moss-like foliage and pink flowers at the same time as P. divaricata, which makes an excellent combination.

Prices on all above Phlox:

15c each; $1.25 per 10.

OUR COLLECTION—10 plants, assorted, three colors. $1.00.

SALVIA

Salvia azurea grandiflora (Pitcher). Great Azure Salvia. A herbaceous perennial growing about three feet tall, with lovely azure-blue flowers from July until frost. 25c each; $2.00 per 10.

SANTOLINA

Santolina Chamaecyparissus. Lavender Cotton. This is the silvery-gray aromatic foliage evergreen herb or shrub so often seen at old cemeteries and houses. 25c each; $2.00 per 10.

VERBENA

Bipinnatifida. Lacy foliage: lilac-purple flowers.

Deep red.

Lavender Oxford.

Mayflower. Pinks.

Royal Purple. Deep purple.

White.

Potted plants ready April 1st. Each 10 100

Prices on Verbena...$ .10 $.90 $7.50

VIOLETS

Violets. Sweet purple. $5.00 per 100.

A pool is easily made, and soon is the center of interest

Flowering and Decorative

PLANTS

For Pots and Greenhouses

Agave americana. The well-known Century Plant. Plants from 6-in. pots, 50c each; plants from 4-in. pots, 35c each.

Bougainvillea spectabilis. Crimson Lake. Known as the “Paper Vine,” as flowers which are borne in terminal clusters on this vine resemble crimson paper. Plants from 5 in. pots..............................$1.00 each

Euphorbia splendens. The “Crown of Thorns.” An unusual spiny, almost leafless plant. Covered all winter with small red flowers. A large specimen of this plant is truly beautiful. Plants from 5 in. pots, 50c each.

Ferns. Asparagus fern. Plums and Sprengeri ferns, Boston or Sword fern and Whitman or Curly fern. Plants from 5 in. pots, 50c each.

GERANIUMS

Jean Vlaud. Large double pink.

Mme. Buckner. Best double white.

Mme. Landry. Lovely double bright salmon.

Ricard. Double bright red.

S. A. Nutt. Double, dazzling red.

Scented Leaf Geraniums: Apple, Lemon, Nutmeg and Rose

Prices on all Geraniums:

Grand Duke Jasmine. The old-fashioned summer flowering, fragrant Jasmine. From 4-in. pots, 50c each; $4.00 per 10.

Hibiscus sinensis. Double Peachblow and Double Red. Plants from 3-in. pots, 50c each; $3.00 per 10.

Lemon Verbena (Lippia). Delicious, aromatic foliage. From 3½ in. pots, 25c each; $2.00 per 10.

Phalus grandifolius. The “Veiled-Nun” orchid. Of easy culture, but quite unusual. Plants from 8 in. pots, $3.00 each.

Plumbago capensis (Cape Plumbago). Flowers all summer of a most pleasing shade of blue.

P. capensis alba. White flowers. Plants from 5 in. pots, 50c each.

In addition to this short list we can supply other decorative and bedding plants, too numerous to mention. No doubt we can supply your wants. Just write us.
When to Plant. As early as possible after the first killing frost, although hardy stock can be transplanted safely at any time during the winter when the ground is not frozen or too wet. Planting can be continued until about the middle of March, or just before the buds begin to swell.

Care of Trees on Arrival. If not ready to plant immediately, dig a trench, unpack the trees and heel in, cover the roots with earth, and water freely. If trees are frozen when received, place them in the cellar or a cool room that is free from frost, and let them remain there until the frost is off. If a cellar is not available, bury the box in sawdust or dirt. If frost is drawn out slowly, trees will not be injured.

Preparing the Trees for Planting. Remove all broken roots. Cut back one-year peach, apple, cherry, pear and plum trees to a naked stem, 1½ to 2 feet high, leaving no side branches. Two-year-old trees should have branches cut back half the length, the lower limbs shorter than those immediately above, then cutting them shorter as you go upward, leaving a long leader. The tree should be set about 2 inches deeper than it stood in the nursery.

Preparing the Soil. Fruit trees succeed best in rich loam, naturally dry or made so by drainage. Prepare the land by plowing and subsoiling. Make the holes at least 2 feet wide, and 2 feet deep. Cover the roots with surface soil, tamping thoroughly as the hole is filled. Use thoroughly rotted manure or bonemeal mixed with the soil. Do not put fresh manure around the roots.

Cultivation. Stir the soil frequently during the summer to conserve moisture and remove weeds. Cut suckers or branches that start below the head. Lime, bone meal, or a high-grade commercial fertilizer may be used as required. For two or three years crops may be grown between the trees—cotton, melons, peas, peanuts, velvet or soy beans. In fall use a cover crop of clover, vetch, or rye, turning this under in spring.

APPLES—America’s Family Fruit

Each 10

Standard, 2-yr., well branched.......................... $ .75 $ 6.50
Standard, 1-yr., 4 to 5 ft. whips ...................... .50 4.00
Standard, 1-yr., 3 to 4 ft. whips ...................... .35 3.00

SUMMER APPLES

Can supply only 1-year summer apples.

Coffman (Summer Red; Coffman June). Medium large, roundish oblong; greenish yellow, striped and splashed with red, with white dots; flesh white, juicy, good quality. Upright grower. Last of June.

Early Harvest (Early June-eating; Yellow Harvest). Medium to large; bright yellow; tender, juicy, well-flavored. An excellent home-market Apple; invaluable in any orchard. June 5, and last two to three weeks.

Horse (Hassel Summer Horse). Large green; acid. Good for cooking and drying. A productive variety. July, August.

Kansas Queen. Large; yellow, nearly covered with crimson; good quality. Reliable, productive, and a good market variety. Succeeds well on light sandy soil. July, August.

Red Astrachan (Red Ashmore; Early Rus; etc.). A beautiful fruit. Large; yellow, nearly covered with crimson, and fine bloom; juicy, crisp, acid. Tree thrifty and profitable grower. Ripens end of May and continues through June.

Red June (Carolina Red June, etc.). Medium, conical; deep red; juicy. Very productive. June 15 to end of July.

Yellow Transparent (White Transparent; Grand Sultan, etc.). Among the finest summer Apples. Fruit yellow and white, crisp, slightly sour, and exceptionally good quality. Tree is a natural low grower, and bears a good crop, even when small. June.

AUTUMN APPLES

Bonum (Magnum Bonum). Medium; deep crimson; firm, tender, juicy, mild, sub-acid. September, October.

Grimes (Grimes Golden). Medium, round, oblate; skin yellow, with small dots; flesh yellow, crisp, rich, subacid; good. October.

Shockley (Waddell Hull; Sweet Romantie). Medium, conical; yellow, with a bright crimson cheek; flesh firm, sweet or sub-acid, with some flavor. Trees erect, vigorous, exceedingly productive. Ripens in August and will keep until following summer.

WINTER APPLES

Delicious. Well named because of quality. A popular western Apple, but equally good in any other section. Skin greenish yellow, almost covered with dark red; flesh fine-grained, crisp and juicy. A splendid market Apple, as keeping and shipping qualities are of first rank. Tree vigorous; bears freely.

Gane (Black Ben Davis; Red Ben Davis; Peyton). Roundish, oblate, large; color deep dark red; flesh yellowish white, mild, subacid. A profitable market apple.

Rome Beauty (Royal Red, Phoenix, etc.). Yellow and bright red; medium quality. Moderate grower; good bearer. An excellent market sort, ripening in October.

Stayman Winesap (Stayman). Dark red; flesh firm, fine-grained, crisp, subacid; best. Strong grower.

Terry (Terry’s Winter). Medium size; red; subacid; best quality. Excellent for market. November 1.

Winesap (Holland’s Red; Winter Winesap, etc.). Small to medium; red; vinous; quality very good. A good keeping Apple.

Winter Queen (Poorhouse). Large; roundish; oblate; pale yellowish green, russet spots; flesh yellowish, moderately juicy, mild, subacid, very good. Tree vigorous, compact grower. Ripens last of October.

Yates (Red Warrior). Small; dark red, dotted with small white dots; flesh yellow, firm, juicy, and aromatic. A heavy bearer and good keeper.
CRAB-APPLES
Transcendent. Fruit sometimes 2 inches in diameter; yellow striped with red. Fine for preserving and jelly. Tree a vigorous and quick grower. Each 10 2-yr., well branched $0.60 $5.00 1-yr., 4 to 5 ft. $0.40 3.50

APRICOTS
Apricots are best adapted for city gardens, or where trees are protected by buildings, fences, etc. A little extra care should be given to protect the flowers from late spring frosts. The trees, when planted in orchards, seldom bear heavy crops of fruit for several years. Ripening period from about June 1 through July. Each 10
4 to 5 ft. $0.40 $3.50

Blenheim. A strong-growing, heavy bearing variety. Oval-shaped, orange-colored fruit; yellow meat, juicy and fairly rich.
Moore (Dunmore; Temple’s; Denancy, etc.). Fruit large; skin orange, brownish red on sunny side; flesh bright orange, freestone, juicy, rich and luscious flavor. Usually hardy; having produced fine crops as far north as Idaho, Late June.
Wilson. At about 10 days earlier than Moorpark.

CHERRIES
Adapted to a wide range of soils and climates. The trees should be planted 12 to 18 feet apart, according to character of soil, and should be trimmed to admit plenty of light and air into the center of tree. Ripening period from June to November. Each 10 1-yr., heavy $0.50 $4.00
4 to 5 ft., heavy .75 6.50 3 to 4 ft. .50 4.50 2 to 3 ft. .35 3.00

Black Tartarian. Very large; black; sweet.
English Morello. Fruit medium to large; dark reddish black.
Early Richmond. Medium size; light red; acid. Late May.
Governor Wood. Large; yellow and red; sweet.
Large Montmorency. The best Cherry for general use. Large; rich red. Follows Early Richmond. A good bearer.

FIGS
Adapted to a wide range of soils and climates. The trees should be planted 12 to 18 feet apart, according to character of soil, and should be trimmed to admit plenty of light and air into the center of tree. Ripening period from June to November. Each 10 1-yr., heavy $0.50 $4.00
4 to 5 ft., heavy .75 6.50 3 to 4 ft. .50 4.50 2 to 3 ft. .35 3.00

Black Ischia. Medium, blue-black; good. Bears abundant crops, and is hardy. 1-yr.
Brown Turkey. Medium; brown; sweet and excellent; very prolific. Most reliable for field-culture. 1-yr.
Brunswick (Madonna; Broughton, etc.). Very large; violet; pulp thick; quality good. Productive and hardy. 1-yr. only.
Celeste (Sugar; Celestial, etc.). Medium; pale violet, with bloom; sweet and excellent. Early. Hardest of all Figs. 1-yr. and 2-yr.
Green Ischia (White Ischia). Medium to large; green with crimson pulp; excellent. Middle of July until frost. 2-yr.
White Geneva. (White Marseilles; White Napa’s). Medium to large, yellow, flesh white, good. 1-yr.

MULBERRIES
Hicks. Fruit sweet, excellent for poultry and hogs. Wonderfully prolific, fruit produced during four months. 4 to 5 ft. $0.50 each

PEACHES
A sandy loam is best suited to the Peach, but it will adapt itself to almost any soil, provided it is well-drained. Plant June buds or one-year-old trees 15 by 18 feet; cut back to 18 to 24 inches, to have a low-headed tree. In spring, after the growth has started, remove all but three branches, and let these be distributed so that the tree will be well-balanced. The first two years fertilize with well-decomposed barnyard manure, or a mixture of one part of cottonseed or homestead to two parts of Acid Phosphate. Apply 1 1/2 to 2 pounds to each tree. After the third year use a fertilizer containing a good percentage of bone phosphate and potash, and a small percentage of nitrog to furnish enough by cutting off one-third of the previous year’s growth. The head of the tree should be broad and open, so as to allow free circulation of light and air. Every summer, cleared woodlands; trees should be cultivated for at least two years before setting the trees, otherwise wood-lice will injure them.
Prices of all peaches. Each 10 100
4 to 5 ft. $0.40 $3.50
3 to 4 ft. .35 3.00
2 to 3 ft. .20 1.75

Belle (Belle of Georgia). Very large; skin white, with red cheek; flesh white, firm, and of excellent flavor. Excellent shipper. Trees a rapid grower and very prolific. July 1 to July 15.
Brackett. A perfect freestone; large to very large; oblong, with sharp apex and shallow suture; color orange-yellow, washed red and mottled deep carmine, with dark carmine cheek; juice rich, black and scored. A tree of best quality, and stands shipping well. August 1 to 15.
Carman. Large; creamy white, with deep blush; skin tough, but flesh tender and of fine flavor. A most profitable and popular shipping variety. June 20 to July 1.
Early Rose. Early, ripening shortly after Mayflower. White; semi-freestone.
Elberta. Large; yellow, with red cheeks; juicy and of good flavor; flesh yellow. An excellent shipping variety. Mid-July.
Greensboro. Round, sometimes elongated; skin white, with red cheek, highly colored in the sun; flesh white, very juicy, of good quality. Favorite and profitable for early market. Late May to June 15.
J. H. Hale. A large, smooth Peach without fuzz. Deep red; flesh yellow of fine quality. Middle to last of July.
Hiley (Early Belle). Large; white with beautiful red cheek; flesh white; quality best. Prolific bearer. Ripens early; late July to August 1st. Early. A good bearer.
Mayflower (Neva-Myas; Early Wonder). An excellent variety. Fruit small to medium, round; entirely covered with red. Blooms late; very hardy. May 15 to June 1.
Slappey. Medium to large; clear, golden yellow. Fine quality. July 5th to 10th.
Summer. Very large; rounded, deep yellow; flesh yellow, juicy, sweet and of good quality. Ripens from middle to end of September. This peach fills a gap in the season of maturity, because it ripens after all good freestones are gone.

PEACHES: Clingstone
Chinese Cling. Very large; creamy white, mottled carmine; flesh, fine-grained, melting, vinous. July 20 to August 1. Indian Cling. This old reliable Ante-Bellum Indian Cling. Fruit medium to large; skin dark, mottled blood-purple; flesh firm, juicy, streaked with red. Last of July to middle of August.
Kent. A most desirable variety which originated at Augusta. Fruit large, slightly depressed at apex, skin greenish-yellow, buttery and of exquisite flavor; skin very tough, but peels readily. July 25th to August 5th.
Red Blush. A large, very early, finely flavored, richly colored, fair quality, and a splendid shipper. Tree hardy; good bearer. June 15 to December.
DEPENDABLE PEARS

Pears are most successfully grown in well-fertilized, heavy clay or clayey loam. If grown in sandy soil, coarse manure or litter should be worked into the soil. Mulching is of great benefit, and the orchard should be kept cultivated at all times.

This list has been reduced to varieties that have proven valuable throughout the largest section of the South. Plant Standard trees 20 to 25 feet apart.

Each 10 Standard, 2-yr. branded .................................. $6.50 $5.50
Bartlett, Large; buttery, melting, of rich flavor. Very popular. End of July and during August.
Chinese Sand Pear (Big Pomelo). This resembles the Kieffer, with crisp, juicy, coarse flesh. Fine for cooking and canning. So far it has proved to be blight-proof. July, August.
Garber. Resembles the Kieffer in size, appearance and quality, but matures here in August, between the Le Conte and Kieffer. A thrifty grower and valuable variety.
Kieffer. Fruit large to very large; skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma; quality good. Tree vigorous and very prolific. Begins to bear when four years old. September, October.
Koone. Medium to large; very handsome; juicy; sweet. Tree a vigorous grower.
Le Conte (Chinese Pear). Fruit large; skin smooth, pale yellow; quality very variable, but if allowed to mature slowly, it gives some of the finest cooking quality. Ripens approximately 20 to end of August. Trees begin to bear when five years old.
Seckel. Of exquisite flavor. The standard quality in Pears. Tree is short, slow grower. September.
S. P. 1. No. 49494. Medium-sized fruit, about 2½ inches long; flesh sweet, juicy, soft, rather fine grained, melting, of good quality. September, October.
S. P. 1. No. 46566. Tree is spreading in habit and has roundish fruit about size of medium-sized apple. Fair quality. Has proven blight-resistant so far.

JAPANESE SIMMONS

The Japanese Persimmon is thoroughly at home in the Cotton Belt and southern Florida, where the fruit is highly appreciated. Some varieties succeed in middle Kentucky, Virginia, and in southern New Jersey. If the fruit is harvested before it is fully ripened, the fruit does not have the characteristic astringency; it is much sweeter and much more palatable. Some varieties have dark flesh, which is edible while the fruit is still hard, but the light-fleshed varieties must be thoroughly matured before they can be eaten, as they are very astringent until fully ripe. The fruit of nearly every variety begins to color when half grown, but should be allowed to hang upon the tree until nearly ripe before being gathered. Late ripening varieties, when fully matured. Many of the late ripening varieties can be kept until February. Distance for planting 25 to 30 feet apart.

4 to 5 ft. ............................................................ $6.50 $5.50
Fuyugiri. Oblate; skin yellow, thick, smooth, and non-astringent, very sweet and may be used while still hard; seedless; good shipper and keeper. September and October.
Galley. Mainly sold for pollination of other Persimmons and for the flowers. Fruit small, pointed end; dull red color; flesh firm and juicy. One should be planted for every ten trees of other varieties.
Hyakume. Perhaps the most desirable of all the round, red fleshed varieties. Fruit large, averaging 3 inches in diameter and 5 ounces in weight, usually flattened, but elongated forms are quite common upon the same branch. Flesh bright orange-red; keeps very late; must be soft before being edible. Tree of moderate height.
Tamakomi. gritty; skin orange-red; thick and tough; flesh light-colored, seedless, of excellent quality; some without astringency and can be eaten while still firm. Tree of average growth.
Tane-Nashi. Large to very large, roundish conical; skin light yellow, changing to bright red; flesh yellow, of finest quality; seedless. Fruit very large. Tree of average growth.
Zenji. Fruit small, 1½ to 2 inches in diameter; weight 3 to 4 ounces; flesh sweet, dark brown, with dark spots. Edible early as middle of September while still solid. Very prolific.

ASPARAGUS

Asparagus is considered one of the most healthful vegetables—a regular spring tonic, so to speak. Everyone should have it. It is best when eaten from April 15th to May 15th, but is capable of being grown in nearly any soil but grows best in rich sandy loam. Do not plant in stiff clay or hard land.
Mary Washington. $1.50 per 100; $7.50 per 1000.

American. Round with pointed apex; skin tough, yellow, heavily washed purple-carminé, cheek darker; flesh quite firm, yellow, juicy, subacid, with apricot flavor; clingstone. June 15 to July 5. One of the best early varieties.

America. Extremely handsome. Large, nearly globular, light crimson flesh light yellow, nearly freestone; flavor unusually good. Burbank. Resembles Abundance but shape usually more globular. Color cherry-red, mottled yellow; flesh, flavor and quality are identical with Abundance, but its period of bearing is from two to three weeks earlier, or middle to late of July. The tree is of vigorous habit, slightly differing from Abundance in foliage.

Compass Cherry-Plum. A cross between the Plum and Cherry. Fully proven as a fruit resembles the former and the tree the latter. Fruit about 1 inch in diameter, and about the shape of a Damson, but red. Has good preserving qualities. Tree bears heavily the second and third years.

Combination. An extremely handsome, large, early, light crimson Plum of the very best quality. Nearly globular, uniform; flesh light yellow, nearly freestone. June 5 to 15.

Columbia. Originated near August. Large; yellow; flesh very sweet, granular. A good cooking fruit. The best late Plum for this locality. 3 to 4 ft. only.

Methley. Red-fleshed, red-skinned variety of very good quality; it is sweeter than many plums and has ready market sale. Ripens about same time as Mayflower Peach.

Ogon (Shiro-Smomo; White Plum). Medium to large; round; golden yellow; flesh yellow, firm, subacid; quality good, free from astringency. A good cooking fruit. June 1 to 15. Tree of vigorous growth.

Red Naga (Red June; Long Fruit). Skin purplish red, with blue bloom; flesh yellow, solid, somewhat coarse-grained, juicy, well-flavored; is a large and very rich-flavored, very good. Unsurpassed for canning. Mid-July. Tree very vigorous. One of the most valuable varieties for this section.

Wickson. Fruit large to very large; waxy white when half-grown, then changes to pink and to dark crimson-purple; flesh firm, yellow, juicy, subacid and highly flavored; pit small, clingstone. July 10 to 25.

Wild Goose (Chickasaw Type). Large, somewhat oblong; bright, vermilion-red flesh, juicy, sweet, of good quality, cling. A very showy and profitable Plum. Middle of June.

POMEGRANATES

Hardy in the Gulf States and central section of Georgia and the Carolinas. Plants often attain a height of 20 feet, are of good form and foliage. Bright scarlet flowers make it a most ornamental plant. It bears fruit the first season it is planted. The demand is increasing in eastern markets and the pomegranate is grown in several sections on an extensive scale. The fruit ships well.

Each 3 to 4 ft., very early. $5.00
2 to 3 ft., bushy. 60 5.00

Purpleseed. Splendid for general culture. Fruit large, thin-skinned, and delicious with purplish or wine-colored flesh, of exceptional quality. Wonderful. A new, late-ripening sort with large, highly colored fruit and fine, sweet pulp.

ZIZYPHUS . Raisin Tree

BLACKBERRIES

Blackberries thrive in almost any soil, but do their best in a strong loam, retentive of moisture, tending toward clay rather than sand, but it must be well-drained at all times. Fertilizers containing a good proportion of potash are the most desirable. To prevent rust, spray with copper-sulphate solution during fall and winter, and with Bordeaux Mixture (4-6-50) during spring and summer. The rows should be 6 to 9 ft. apart and the plants from 3 to 4 ft. in the row, according to the character of the soil. If desired to cultivate both ways, set the plants in checks, 6 to 7 ft. each way. As soon as the fruiting season is past, remove the old canes and burn at once. The young canes should be clipped. This will cause them to branch and they will become self-supporting. Apply fertilizer during the late winter and give shallow and constant cultivation.

Eldorado. The large berries, borne in big clusters, ripen well together. Very sweet—no core. A heavy bearer and a valuable sort.

Himalaya. Strong grower; very prolific. A desirable variety. On account of quick growth should be grown on trellis.

Mersereau. A most valuable variety. Fruit of immense size. Early and enormous bearer. Very hardy.

DEWBERRIES

Use short, stout stakes, driven at the end of each row of canes, with a cross-piece 18 in. long nailed to each stake, 2½ ft. or 3 ft. from the ground. On the top, near each end of these cross-pieces, drive a stout nail, slanting toward the stake, upon which to catch a wire. Two lines of No. 14 galvanized wire, one on each side of the row, are fastened to one end of the stake and run on the ground between the rows to the other end stake. Draw wires as taut as possible and securely fasten to the other end of the row. The canes are now raised and caught on the nails, thus holding all the canes closely together in the row. Dewberries should be mulched to keep the berries from the ground.

Latham. Large; red; luscious. Very productive. Splendid shipping qualities.

Randere (St. Rogue). Berries large, bright crimson; flesh rich. Wonderfully prolific. Produces its fruit early and through a long period. We consider it one of the best Raspberries ever sent out.

YOUNGBERRIES

Youngberries. Fruit larger than Dewberries, with a decided flavor of Raspberry. Splendid for home use, but will not ship well. Delivery in March.

PRICE ON ALL ABOVE BERRY PLANTS

10c each; 80c per 10; $6.00 per 100.

F. O. B. Augusta.

GRAPE—We Have the Best Varieties

In transplanting Grapes, leave the main branch and cut this back to two or three eyes. The usual distance for planting Grapes is 10 by 10 feet. If you want to get good results from your Grapes prune annually. The varieties here described have been thoroughly tested in this section. Our plants are strong and vigorous.

Strong plants, 25c each; 2 for 10c; 10 for $1.50 per 100.

Amber Queen. Pale amber berries of medium size, with sweet, fine flavor. Long branches.

Brighton. Bunches medium size; berries large, reddish; skin thin; quality best. Excellent for early table or market. Vigorous.

Caco. Most delicious of all red grapes. Very sweet and tender. 80c each.

Catawba. Large bunch and berry; deep red, with lillac bloom; juicy, vinous, and of musky flavor. Very hardy.

Austin’s Improved. Very large fruit. Vigorous grower and productive. The best variety for the South.

Lucretia. Low-growing. In size and quality of fruit it equals any of the tall-growing sorts. Hardy and very productive, with large, snowy flowers. Fruit sweet and luscious. Early.

RASPBERRIES

These thrive best in a deep, moist, well-drained soil; the lighter loams are best for the red sorts, and the heavy loams for the blackcaps. Cottoneed meal, pure ground bone, or fertilizers containing a good proportion of potash are best and should be liberally applied during the winter and early spring. To get the best results and keep the plants in vigorous condition, they must be mulched heavily with straw.

Cumberland (Black). Very large, firm berries of high quality. The best midseason market variety, giving the utmost satisfaction to both grower and shipper.

Cuthbert (Queen of the Market). The best and most reliable of the red-fruit varieties. Fruit large, red, and of excellent quality; ripens midseason. Harvest May and continues for several weeks. Prolific bearer. Fine shipper.

CONCORD. Bunch and berry, very large, blue-black, with bloom; skin thin, cracks easily; flesh very sweet, pulpy, tender; quality good. One of the most reliable and profitable varieties.

Delaware. Compact bunch; berry medium, light red, quality best. Moderate grower, but wine healthy, prolific, and more free from disease than any other variety. The most popular Grape grown. Unsurpassed for table and white wine.

Ives. Bunch large; berry large, blue, skin thick; flesh pulpy, sweet and musky. Vigorous grower, and prolific. Bears well and is a bearer.

Knight. Bunch compact; berry medium, blue-black. Vigorous grower. Ripens last of July; fruit matures for a long period.

Lindley. Bunch medium, loose; berry medium, to large; color red; flesh tender, sweet, rich, aromatic flavor. Midseason.
GRAPES—Continued

Moore Early. Bunch medium; berry large, round, black, with heavy blue bloom; medium quality. Early and desirable.

Niagara. Bunch and berry large; greenish yellow; flesh pulpy, sweet. Its remarkable size and fine appearance give it much popularity as a market variety. Vigorous and prolific.

Worden. Reminisces Concord, but is a few days earlier, and generally regarded as a better grape.

BULLACE, OR MUSCADINE GRAPES

Vitus rotundifolia or vulpina. This type is purely Southern, and is of no value for the northern or western states. Vine is free from all diseases. The fruit never decays before maturity. Cultivation is reduced to the simplest form — plant from 20 to 30 ft. in row; train on an arbor or trellis.

P. L. A desirable California variety. Sturdy, upright grower: nut large; soft shell; heavy bearer. 1-yr., 3 to 4 ft.; 75c each; $6.50 for 10.

ALMONDS

Almonds can be successfully grown in some sections of the South, but, owing to their early blooming periods, the fruit is sometimes killed by late spring frosts. The Almond requires the same cultivation as the peach.

BYNUTS

Butternuts (Juglans cinerea). Tree large. Native New Brunswick and Georgia to Dakota and Arkansas. Fine autumn color. Fruits in clusters. Kernels sweet and edible. Fine for orchards or special planting. 3 to 4 ft., 75c each; $6.50 for 10.

WALNUTS

English or Persian (Juglans regia). Requires a rich, well-drained, and preferably stony soil. Never plant in hardpan, heavy clay, or soils which are not properly drained. In some sections of the Eastern and Southern States the English Walnut is quite successfully grown. 18 to 24 in., 75c each; $6.00 for 10.

Pecans (Juglans nigra). A native of the Southern States. The tree is very handsome and has a large, spreading top. It makes a useful as well as an ornamental tree. At three years of age the tree commences to bear. The shells are moderately thick, but the kernels are very sweet. 2 to 3 ft., $1.00; $8.50 for 10. 18 to 24 in., 50c each, $4.50 for 10.

PECANS

Pecans are a paying investment when the proper stock is used and given the right soil and climate. We offer the best varieties, bearing nuts of large size, good flavor, thin shell and of easy cracking qualities, all of which are propagated from grafts or buds, on three-year seedlings. They are hardy and satisfactory.

Plant Pecans 50 to 60 feet apart, according to soil, which should be good. Pecans grow well on rich bottom soils, on high land of the sandy pine-levens, on sandy soil where there is clay subsoil, but not in deep sand and never in pipe clay or undrained land. A good soil will kill or injure the trees and never be satisfactory. To get crops, you must cultivate, fertilize, and properly prune the trees. The Pecan is long-lived. Our trees, if properly cared for, should bear in five years. Bear paying crops at eight years, and should produce 15-20 pounds of nuts per tree at 10 years.

Planting and Cultivating. After Pecans reach maturity in fall, transplant large trees. Some trees may be covered with moss or wet sacks at all times before planting, but they must not dry out. Dig hole, 2 ft. in diameter, for 15-20 pounds of turf; place roots in hole; pack mud around roots. Hole should be 2 feet wide and deep enough to set tree a trifle lower than it stood in nursery. Fill in and tamp down, and cut off ends of broken roots with sharp knife. Keep tree upright, and do not tamp or pat down. Handle with care as a nursery stock, and be sure to receive a good stock from a reliable nursery and to be very careful about the tree's condition. Keep out injurious insects and diseases by spraying with oil, sulfur, or other trees around. If a disease develops, spray with oil, sulfur, or other fungous products. See illuminating articles on Pecans for further advice.

NUTS

Flowers. Bunches have from 15 to 25 berries; black and sweet, vinous flavor. Matures from end of October, or four to six weeks later than Scuppernong.

Hunt. Vigorous grower; healthy foliage; good bearer; large black fruit; medium skin; good flavor, ripening in late August. 35c each; $3.00 per 10; $25.00 per 100.

James. Berries large, blue-black, in clusters of from 6 to 10; skin thin; pulp tough, sweet and juicy, but not dissolving; quality good. A showy fruit. Ripens after Scuppernong.

Scuppernong. Berries large; seldom more than 8 to 10 in a cluster; color brown; skin thick; flesh dry or hard; sweet and of a peculiar musky aroma. Vine is free from all diseases and insect depredations. Wonderfully prolific, and a sure bearer. 2-yr. only.

Thomas. Bunches of 6 to 10; berries slightly obovate, large, violet, quite transparent; pulp tender, sweet, and of a delicate vinous flavor. Best of type. Very little musky aroma. Middle to last of August.

roots. Hole should be 2 feet wide and deep enough to set tree a trifle lower than it stood in nursery. When hole is dug out, and tree set, cut off ends of broken roots with sharp knife. Cut off part of taproot so the tree will force lateral roots. Fill hole with rotting manure, or a well-rotted top-soil, or other detritus, and smooth surface, and firm in. Be careful not to break eyes of trees when handling. Keep trees cultivated and properly pruned. Between the rows you may plant cotton, potatoes, melons, or any other crop, for several years, but never small grain. When trees go into bearing, plant and turn under a cover-crop of soy beans, vetch, or clover.

Excellent results are obtained in planting Pecans with dynamite— one-half pound of dynamite to each tree. This breaks the sub-soil, and permits the long taproot to find food on lower levels.

For fungous diseases and insects injurious to the Pecan, see Spraying Table on Page 44.

Frotscher. Very large, nuts average 45 to 50 to the pound. Shell very thin; can be cracked with the teeth. Meat sweet and of fine quality, and can be removed entirely from the shell. One of the best Pecans grown, bringing good prices on all markets, and yielding profits to the grower.

Moneymaker. It is an early bearer, prolific, healthy, and remarkably free from nut diseases that ruin a great many of our best varieties of Pecans. Size medium, round, oblong. A heavy bearer. A good variety.

Schley. Medium to large; to 12 to 1½ inches long; oblong, slightly flattened. Shell thin; plump, rich flavor. Good grower. One of the best varieties because of size, appearance, and quality. Has not been removed completely from the shell.

Stuart. Nut large to very large; 1½ to 2½ inches long; oblong; shell of medium thickness, and of very good cracking quality. Kernel full, plump, of best quality. Flavor rich and sweet. A good grower; heavy bearer. An excellent variety thriving over a wide section of the South.

All Pecans: Each 10 100
5 to 6 ft., heavy $1.00 $0.90 $88.00
4 to 5 ft., heavy 0.90 0.80 75.00
3 to 4 ft., heavy 0.50 0.40 60.00
2 to 3 ft., heavy 0.50 0.40 50.00

MAKE HOME COOLER AND MORE BEAUTIFUL WITH TREES AND FLOWERS
SPRAYING MATERIALS

It pays to spray fruit trees and grape-vines if you want the best fruit. Spraying can be easily done and spraying apparatus can now be had for a small sum. On page 44 is a complete spraying guide which gives information on sprays to use for different insects and diseases. For success in spraying follow this guide and use the right material. It does not pay to experiment. We offer a few reliable Spray Pumps and materials for your convenience.

Sterling Sprayer, No. 115GF, Galv. Tank, funnel top, 3½-gallon capacity .... $5.50
Sterling Sprayer, No. 115BF, Copper Tank, funnel top, 3½-gallon capacity .... 8.40
Climax Sprayer, No. 135GF, Galv. Tank, funnel top, 3½-gallon capacity .... 4.25
Climax Sprayer, No. 135BF, Copper Tank, funnel top, 3½-gallon capacity .... 6.25
Misty Sprayer, No. 452G, Galv. Tank, sturdy construction, 1-quart capacity .... .50
Misty Sprayer, No. 452B, Copper tank, 1-quart .... .75

Insecticides and Fungicides

Black-Leaf Mixture. Lb., 35c; 5 ozs., $1.00; 1 lb., $2.25.
Bordeaux Mixture. Lb., 35c; 4 lbs., $1.00.
Lime Sulphur. Gal., 75c.
Nutone. 4 lbs., 60c.
Paradime. Lb., 50c; 5 lbs., $2.00.
Sealicide, in cans.
Qt., 75c; gal., $1.55.
Volck, Garden, 3½ ozs., 35c; pt., $1; qt., $1.50; gal., $4; 5 gal., $12.50.

A New and Better Garden Glove

Made from special imported hides processed to render them amazingly soft and pliable. Permit almost barehand freedom, yet provide complete all-leather protection. Ideal for garden and similar uses.

DIPTPROOF, DURABLE, and WASHABLE. Four sizes: "Small" and "Medium" for women; "Medium" and "Large" for men. 75c a pair—2 pairs for $1.50. This is the first time we have ever offered an all-leather Garden Glove with these special qualities at such a low price.

Pruning Shears

Indispensable in every garden—you can't do good work without a pair. Pesto Shears are American-made, 9 inches long, first-quality steel, and offered at only $1. Postage extra.

Labels, Plant

Copper Wire. 3½-in. 50c per 100; $3.00 per 1000.
Pots. 10¾-in., 85c per 100; $2.00 for 250. The 3½-in. Labels are put up 500 to a box, and the 10¾-in. 250 to a box.

Wizard Brand Sheep Manure

$2.75 per 100 lbs.

Bonemeal

$2.75 per 100 lbs.

Peat

Imported. $3.00 per bale.
Florida. $3.25 per bale (7 cubic feet). Prices on ton lots on application.

Frain's Tree Dressing

Prevent decay and subsequent loss of trees by using this handy dressing. Easy to apply; effective; scientifically prepared. Use on all damaged parts, and after trimming trees.
Qt., 50c; gal., $1.50.

“Gumfinger” Lawn Rakes

An Ideal Gardening Tool

The teeth are live, resilient rubber, stiff enough to rake clean, but flexible enough not to tear or uproot the grass.

Rakes cleanly over rough surfaces. The rubber teeth adjust themselves to every irregularity in the ground. Light and easily handled, its live springy action makes it ideal for the person who enjoys working in their garden and yard. There is no risk of injury if this rake is left with the prongs turned upright.

“Gumfinger” Lawn Rakes are tough and resist wear. They can't rust or break. Guaranteed for three years.
16-in., $1.50; 20-in., $1.25; 24-in., $1.50.

Stim-U-Plant

Stim-U-Plant tablets are a concentrated plant-food for shrubs, roses, and vegetables. Gets marvelous results; easy to apply. Small packages, 25c; 100 tablets, 75c; 1000 tablets in bucket, $3.50. Full directions.

SHADE TREES

Are usually attacked by scale insects which may be controlled while trees are dormant with Scalecide: 1 gal. to 15 gals. water. Root-borers in peach trees may be controlled by Paracide, applied in early autumn—October 10 in this locality. For table of smaller quantities, see full directions on each container sold by us.

SPECIAL NOTE—Read Carefully

We desire the names of persons who you know are interested in flowers and beautiful surroundings; those who are building fine new homes or have grounds that need landscaping. If you know of only one or two send them in to us with your order. It will be a favor to us and one we will appreciate.

NOTE—Please give street address with above names when necessary.
AZALEAS in Various Colors add to the beauty of your Outdoor Living-Room

...Beautiful colors, long season of bloom, and hardiness of plants are the three factors that make Azaleas among the most desirable of all the southern flowering shrubs. They are happiest when grown in a mixture of common soil, leaf-mold, or muck, with a little well-rotted manure. The roots are near the surface, therefore a mulch of peat moss, leaves, or pine straw will be useful. Avoid lime, potash, or clay.
